Introduction

Welcome to 3UP Gaming, where innovation meets excellence in the world of online gaming. With a team of 20 highly educated professionals, all graduates from renowned universities, we are dedicated to delivering top-tier experiences. Our commitment to excellence is reflected in our -24hour support, ensuring that our players always feel valued and supported. At the heart of our online poker platform lies a dedication to fairness and transparency, powered by state-of-the-art technologies. Join us as we redefine the online poker experience, blending cutting-edge technology with the thrill of the game.

Our journey began eight years ago, driven by a passion for innovation and excellence in online gaming. Throughout this time, our dedicated team has tirelessly worked to refine and enhance every aspect of our platform, placing the needs and experiences of our users and players at the forefront of our endeavors. With a relentless commitment to keeping our platform up to date and fair, we have spared no effort in implementing continuous updates and improvements, ensuring that our players always enjoy a seamless and immersive gaming experience. From refining game mechanics to enhancing user interfaces, we strive for perfection in every aspect of our platform.

As we continue to evolve and grow, we remain steadfast in our mission to provide the ultimate online poker experience for our players, setting new standards of excellence in the gaming industry.

At 3UP Gaming, our dedication to innovation goes beyond rhetoric. We harness the power of advanced technologies to create an unparalleled gaming environment. Our platform boasts a myriad of technological features designed to elevate gameplay and enrich the user experience.

First and foremost, our cross-platform compatibility ensures that players can enjoy seamless gameplay across a variety of devices and operating systems. Whether you're gaming on Windows, Linux, macOS, iOS, Android, or Progressive Web App (PWA), our platform delivers a consistent and immersive experience every time. Moreover, our platform supports both portrait and landscape orientations, allowing players to choose the gaming style that best suits their preferences.

In addition to cross-platform compatibility, our platform is fortified with advanced security measures to protect the integrity of gameplay. Individual IP tracking and fraud detection algorithms work tirelessly behind the scenes to identify and address potential threats or irregularities. This commitment to security ensures that players can enjoy a safe and fair gaming environment without compromise.

Furthermore, our platform offers a range of customization options to cater to the diverse needs and preferences of our players. From customizable time settings to API access for seamless integration with external applications, our platform empowers players to tailor their gaming experience to suit their individual tastes.

As we look to the future, we remain committed to pushing the boundaries of innovation in online poker development. Our talented team continues to explore new technologies and methodologies to enhance our platform and deliver even greater value to our players. Join us at 3UP Gaming and experience the next evolution in online poker gaming.

Distinctive Features

Builds

Experience uninterrupted gaming sessions with our cross-platform compatibility feature. Whether you're on Windows, Linux, macOS, iOS, Android, or utilizing Progressive Web App (PWA) functionality, our platform ensures seamless gameplay across all devices and operating systems. Switch effortlessly between portrait and landscape orientations, adapting to your preferred gaming style without compromise. Enjoy the freedom to dive into the action anytime, anywhere, with a consistent and immersive gaming experience tailored to your device preferences.
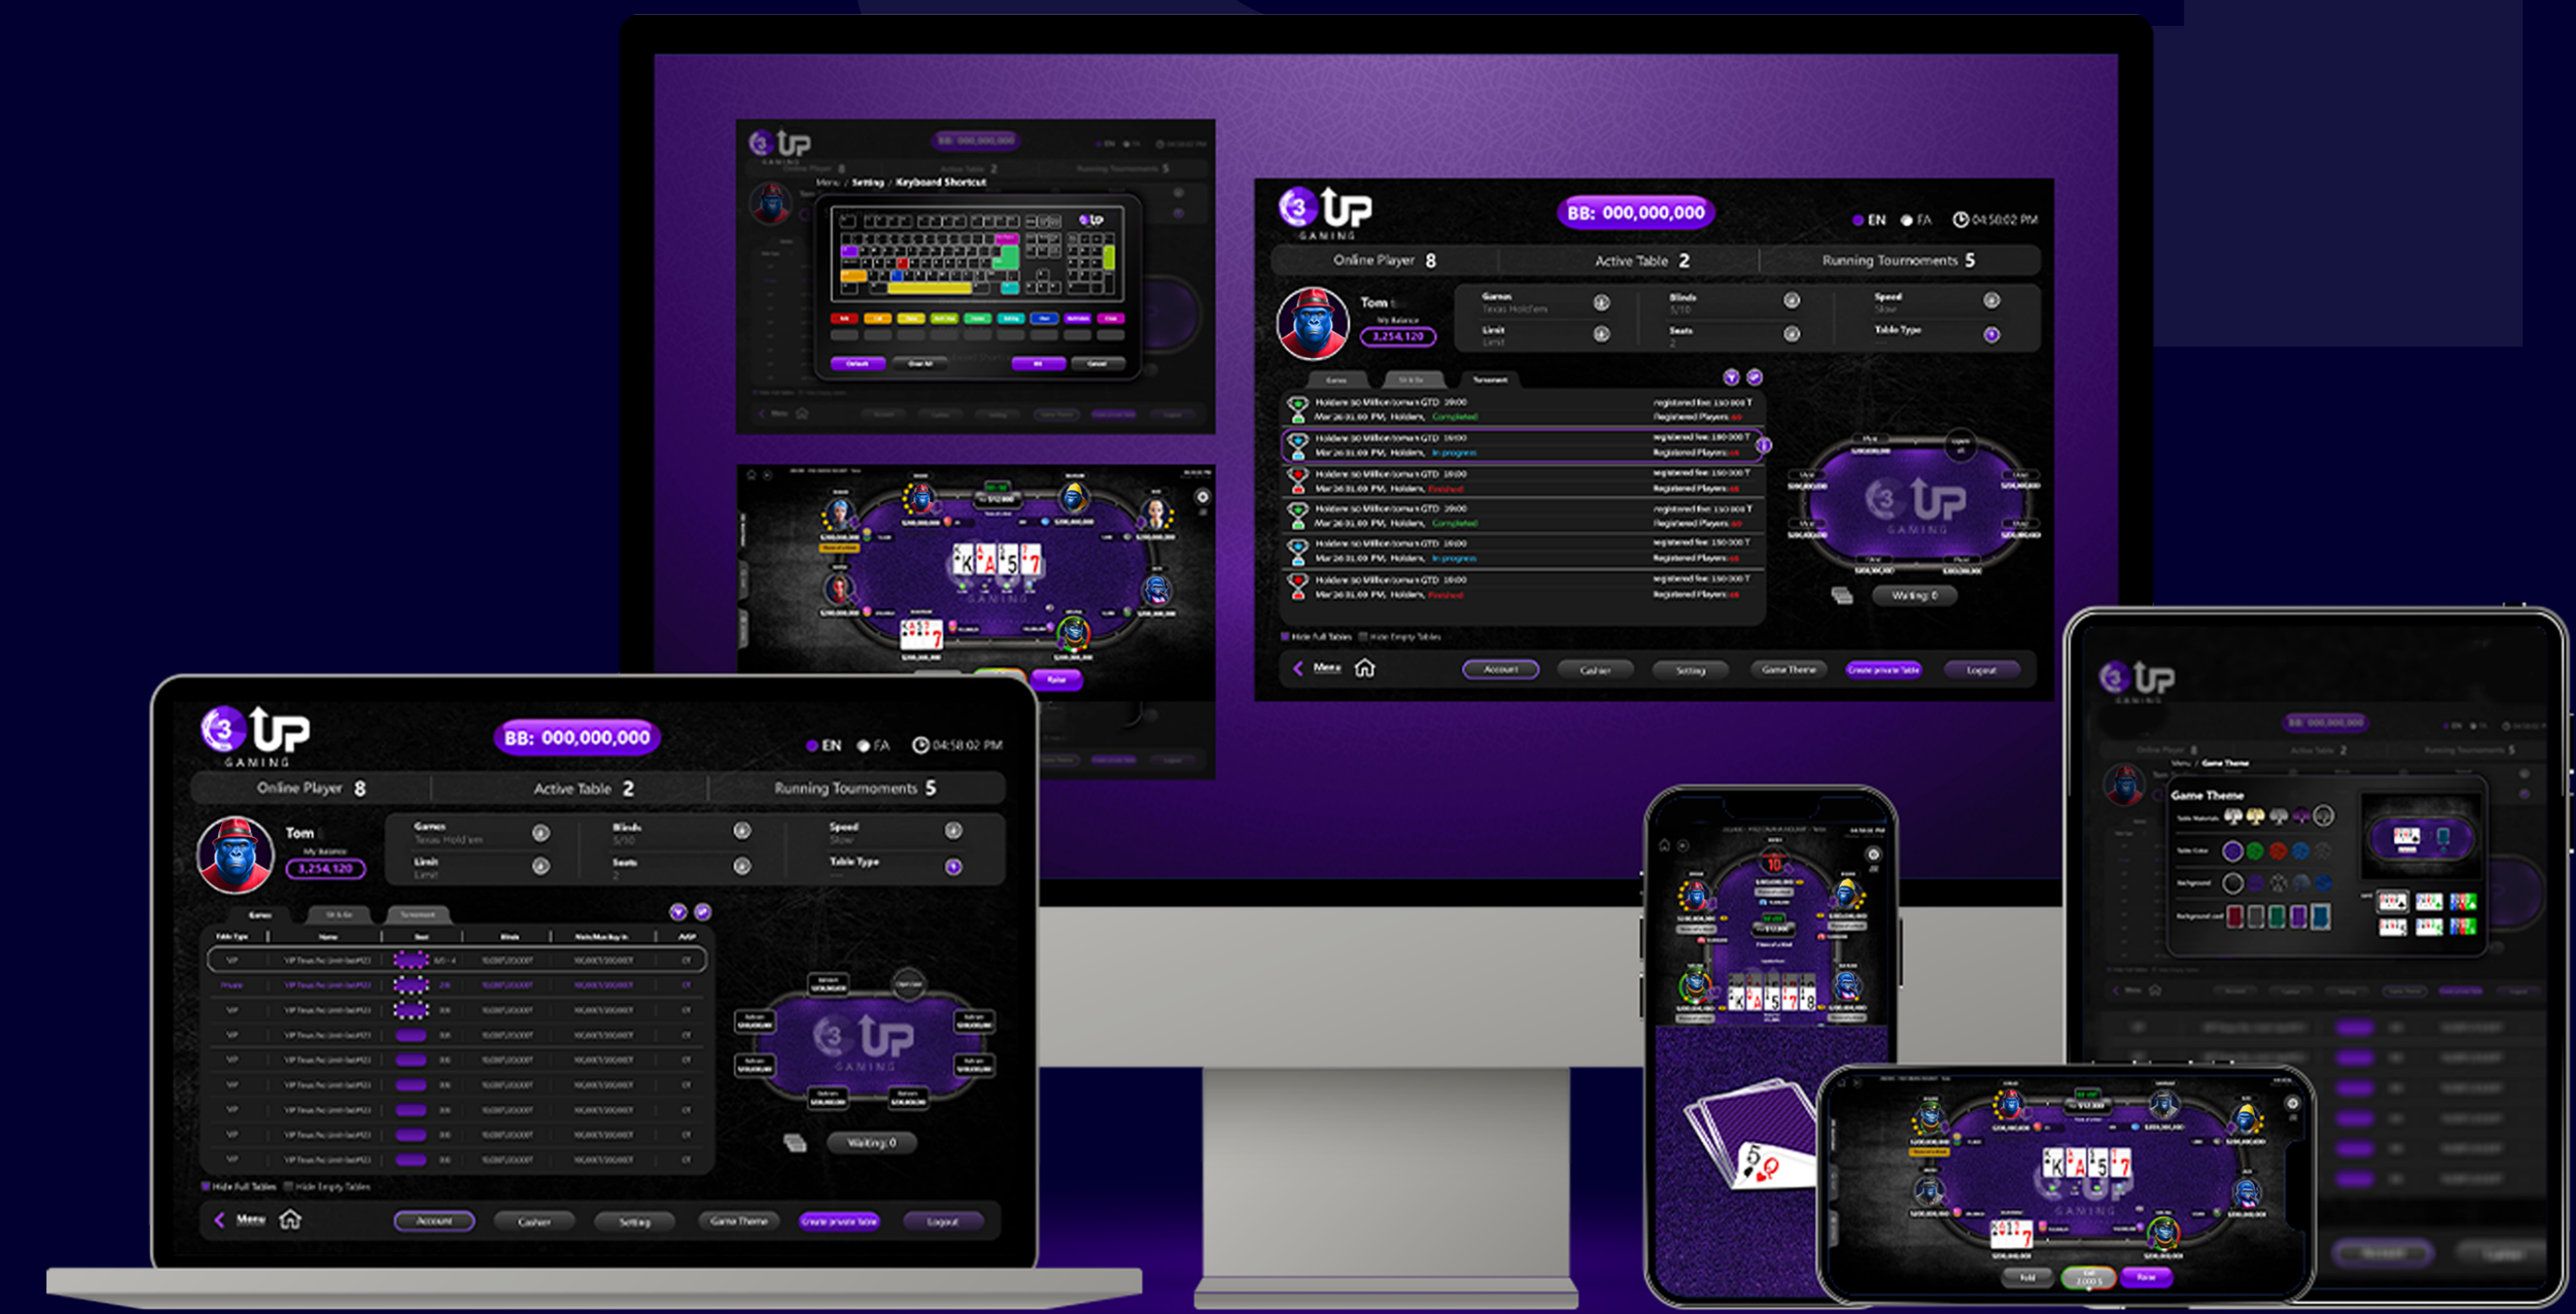

Game Types:

1.Texas Hold'em: The most popular form of poker, where players are dealt two private cards ("hole cards") and must make the best possible hand using a combination of their own cards and the five community cards.

2.Omaha: Similar to Texas Hold'em, but players are dealt four private cards and must use exactly two of them, along with three of the five community cards, to make their hand.

3.Omaha 5: A variation of Omaha where players are dealt five private cards and must use exactly two of them, along with three of the five community cards, to make their hand.

4.Omaha 6: Another variation of Omaha where players are dealt six private cards and must use exactly two of them, along with three of the five community cards, to make their hand.

Limit Types:

1.No Limit: Players can bet any amount of chips at any time during the hand, up to the total number of chips they have.

2.Pot Limit: Players can bet up to the total size of the pot at any time during the hand.

3.Fixed Limit: Players can only bet or raise a fixed amount determined before the game starts.

4.All In/Fold: A player bets all of their remaining chips on a single hand.

Table Type:

1.Normal: Standard gameplay without any special rules or conditions.

2.Twice: Players have the option to run the board twice, meaning they deal two separate runouts and split the pot if they win both times or share it if they win one each.

3.Run In Two Times: Similar to running the board twice, but players can choose to run the board multiple times, dividing the pot accordingly.

Customized Table:

Enhance your poker experience with our customizable table options, designed to add excitement and variety to your games. You can select one, two, or all three options simultaneously for your preferred table.

1.Straddle: A voluntary blind bet made by the player to the immediate left of the big blind before the cards are dealt.

2.Jackpot: A special option where players have the chance to win a jackpot prize by meeting certain criteria, such as hitting a specific hand.

3.Mixed Table: A table option with a mix of different game types and limits, providing variety for players.

Private Table:

Premium users have the privilege of hosting private tables with restricted access, ensuring a secure and personalized gaming environment. These tables typically require an invitation or password to join and are available across all table variants. This feature is ideal for groups of friends or players seeking a more controlled setting for their games.

To access these premium features, users can upgrade their accounts through our payment options. For detailed information on pricing and policies, please refer to our official guidelines or contact our support team.

Customized Times:

Experience personalized gameplay tailored to your preferences with our customizable time options:

● **Customized Acts (Speed):** Choose from **normal, fast**, or **turbo**-paced gameplay options to suit individual player pacing and preferences.

● **Time Banks:** Allocate time banks to players for strategic decision-making during gameplay, empowering players with the flexibility to manage their time effectively.

● **Discount Times:** Enjoy discounted time options for enhanced accessibility and affordability, ensuring an inclusive and accommodating gaming experience.

● **Sit-Out to Leave Players Off Table:** Grant players the flexibility to temporarily sit out and leave tables as needed, providing control and convenience over their gameplay experience.

Governing Rules and Gameplay Mechanics:

At 3UP Gaming, we emphasize fairness, integrity, and an enjoyable experience for all players. The rules outlined here govern gameplay, ensuring a smooth and engaging environment for everyone. Understanding and adhering to these guidelines is essential for mastering the game and enjoying the full experience our platform offers.

1- Show/Muck

An option will be available to show or hide information, allowing players to thoroughly review the rules and regulations.

2- Hand & Hand Updates

Players are provided with real-time, accurate information about their hands, fostering transparency throughout the game. Additionally, they can view the best cards they've had in previous games, along with a record of winners and losers.

3- Sit Out next Big Blind (BB)

This allows users to go in and out of the for the next game. Players will need to pay something called "Big" so they can join.

4- Sit Out All Tables

Users can simultaneously sign out from all active games they are participating in without any issues.

5- Sit In

If a user quit a game and wants to rejoin it and would want to make another game has to sit in with a mandatory payment made.

6- Wait for Big Blind (BB)

Players can choose to wait for the Big Blind, allowing them to join without paying for a Big.

7- Pre-Bets and Betting Strategies

With options like 'check', 'check/fold', 'raise any', 'call any', 'fold', 'call-bet', and 'raise bet' players are equipped with a wide array of strategic choices during betting rounds. This flexibility enhances tactical decision-making throughout the game.

8- Forced Payments

Players can join the game firstly by paying a small fee or have to sit in or out that requires a payment accordingly.

9- Buy-In and Add Chips

Players can set their buy-in limits based on their preferred stakes. The system automatically returns excess funds when leaving a table with a stack larger than the maximum buy-in. Additionally, Add Chips allows players to top up their stacks during gameplay without disruption.

10- Auto Switch and Multi-Table Play

Players can seamlessly switch between tables and engage in multiple games simultaneously, enhancing the complexity and depth of their poker experience.

11- Customization Options (Chat, Mute Sound, Squeeze Card)

Players can control their experience by enabling/disabling the chat function, muting in-game sounds, and using the Squeeze Card feature for an interactive card reveal on mobile devices.

12- Run It Once/Run It Twice Buttons

For added flexibility, players can choose whether to run the board once or twice, offering customized gameplay experiences.

13- Join waiting list

Players who are wanting to join a table will be put on the queue to then join at an appropriate time.

14- Multi-Table

If players are at different tables, they can view them simultaneously on their Windows OS.

15- Auto-reload

If in any circumstances the game gets disconnected the game will try to reload the game without the need for manual reset.

16- Disconnect time

A time will be displayed for the players to know when they can be joined approximately.

17- Time Bank

Time bank is a functional button where players can set to allocate their own wait time to spend when making the moves in the game.

18- Waiting position rules

A mandatory Force Blinde made by the player wanting to join the game. They either pay big blind or big.

19- Pre bet

The player is given access to set the rules when waiting for their next position move in their game. Buttons like Fold, Rais, Call, Call any, ,Raise and etc any will show up to set their position in the game next turn.

Notable Features:

Explore the remarkable features that set our online poker platform apart from the rest. From innovative gameplay mechanics to intuitive user interfaces, our platform offers a wealth of notable features designed to enhance your gaming experience. Discover how these features elevate gameplay, foster community engagement, and redefine the standards of excellence in online poker.

Each player will be labeled by your own notes within the game, and later on you can identify the player even if they change their username.

● **Game themes:** Customize your gaming experience with a variety of themes, six model cards with different design, three small cards, and different colors including background, background cards, table theme, and colors, changing all buttons colors in the game, including the ribbon around the table, allowing players to create a unique and immersive

gaming environment.

- **Keyboard shortcuts:** Increase efficiency and streamline gameplay with quick keyboard shortcuts, providing convenient access to essential game functions which are exclusively for the desktop users only e.g. macOS, Windows, and Linux players.

- **Squeeze card:** Experience the excitement of real-life card inspection with the squeeze card feature, adding a tactile element to gameplay.

- **Filters and sorting:** Easily navigate the lobby with filters and sorting options, displaying average pots and open seats, and enabling players to find their preferred tables quickly.

- **Mini live table:** Stay updated on ongoing games with a mini live table view within the lobby, allowing players to monitor gameplay while browsing for tables for desktop users only and also the dealer can stack players with nickname and board cards.

SQUEEZ CARD

● **Avatars:** Personalize your profile with customizable avatars, expressing your unique identity and style within the gaming community.

● **Contact us link:** Access support and assistance easily with a dedicated contact us link, ensuring prompt resolution of any queries or concerns.

● **Help for players:** Access helpful resources and guides to enhance your gameplay experience, providing assistance and support whenever needed.

● I**nbox for messages:** Communicate privately with other players through an inbox messaging system, facilitating social interaction and collaboration within the gaming community.

● **Video replay:** Review and analyze past games with video replay functionality, allowing players to learn from their gameplay and make informed decisions in future sessions.

VIDEO
REPLAY

15
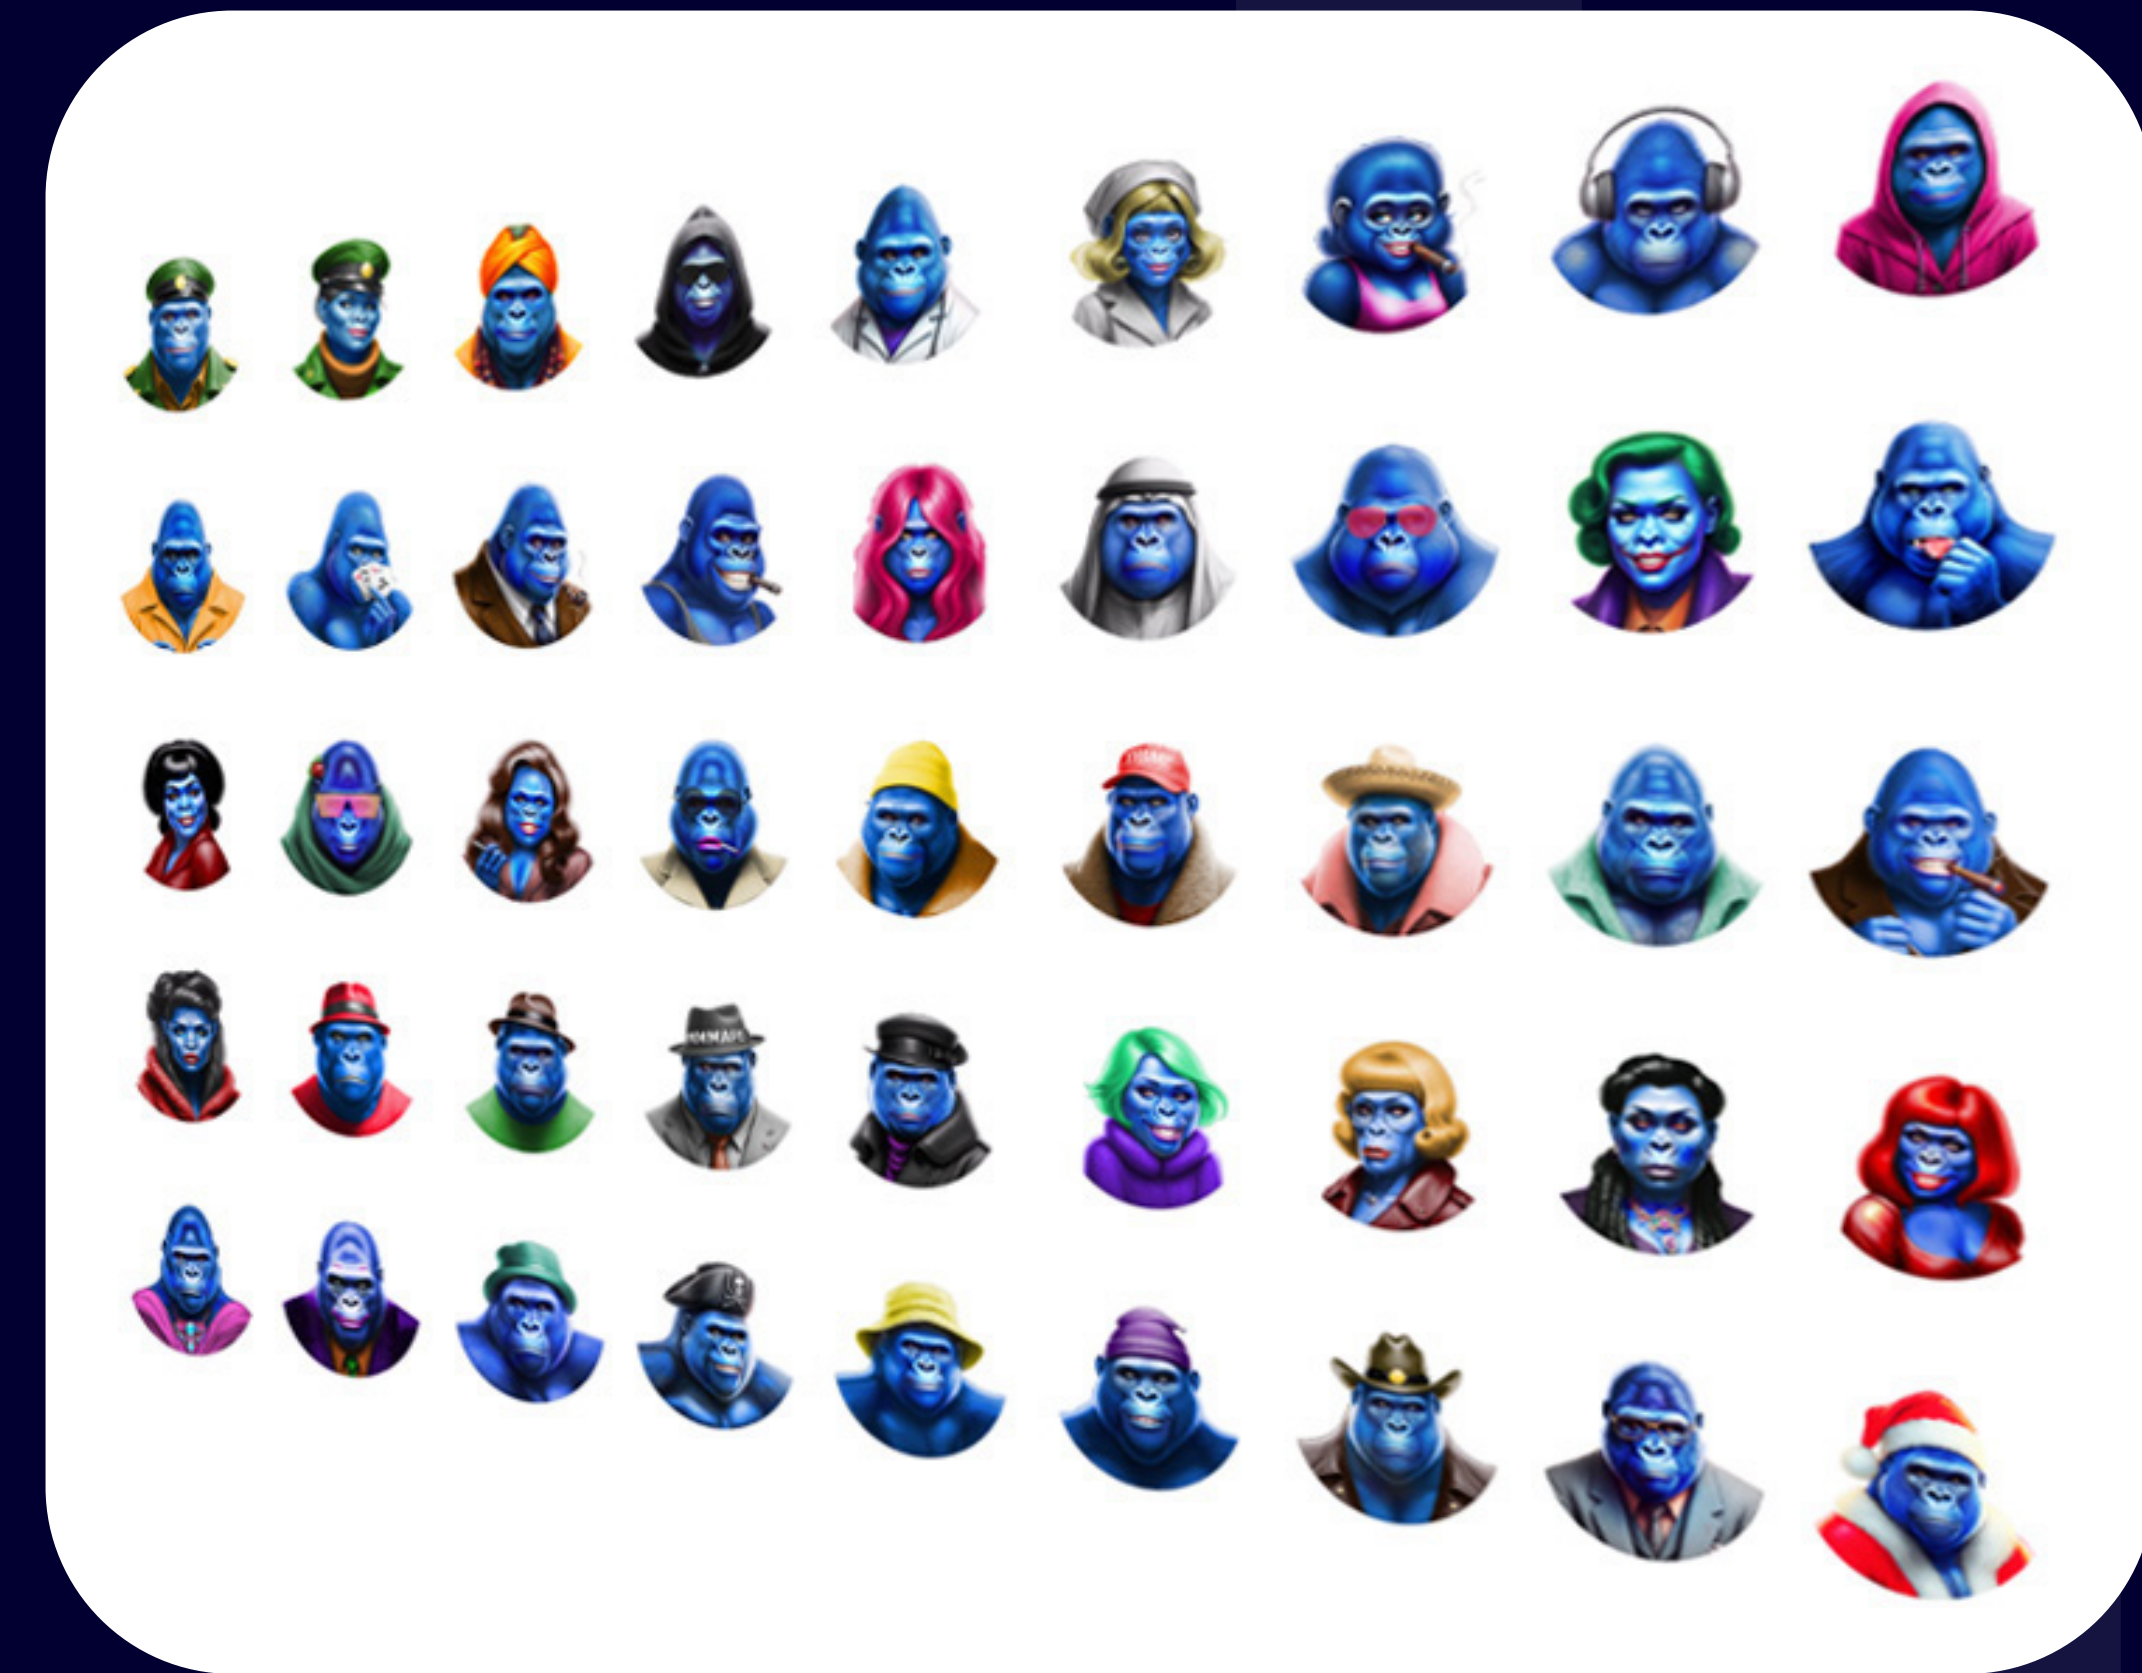

● **Update Hand (Real-time):** Each round the status of your card designating how high hand you have will update on top of the table just below the pot amount.

● **Update Hand (Winners & losers):** The update hand shows up where the game finishes, and the status of each user hand updates whether they are a loser or a winner.

● **Chat history:** Access previous conversations with a chat history feature, enabling players to revisit important discussions and interactions during gameplay.

● **Game history:** Keep track of your gaming journey with a comprehensive game history feature, providing records of past games for review and analysis.

● **Notifications:** Users can stay informed with notifications installed on their devices from the admin panel set up.

● **Disable Chat:** with the option to customize settings and disable chat for other players you can enjoy a personalized and uninterrupted gaming experience.

● **Ante:** Infuse extra excitement and strategy into tournament gameplay with implemented antes, intensifying each hand and raising the stakes.
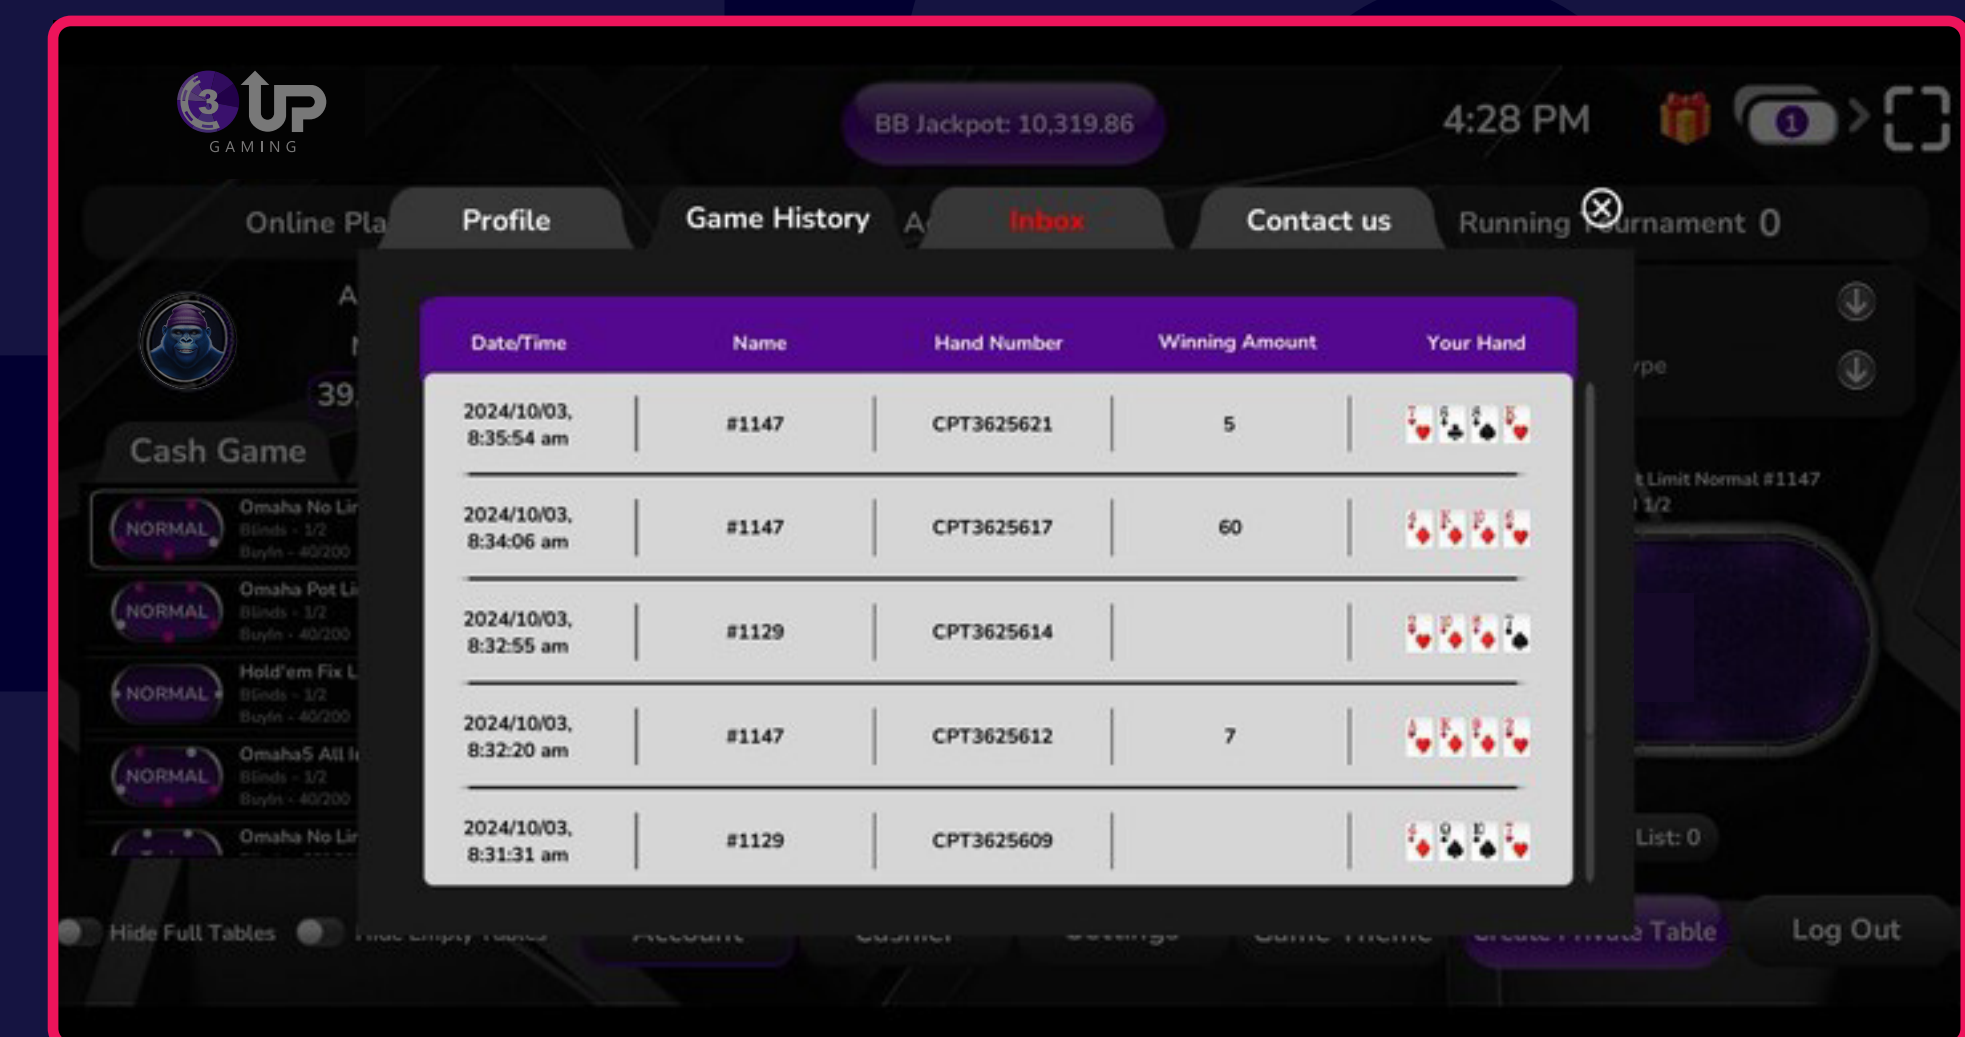

- **Multi-language:** The game allows you to add multiple languages such as English, French, Spanish, Dutch, etc.
- Player profile: Players can view their personal information including the name, email, amount they won, etc.
- **Password protection:** Users can safely change their password and login to their account using two factor authentication for strong protection.
- **Heads Up Display:** They can easily set their game for two players conditions.
- **Live Leaderboard:** The number boards and top players will be showcased live.
- **Sort Empty Table:** This filter can showcase only the empty tables at the time.
- **Sort Full Table:** This filter can showcase only the full tables at the time.
- **Time Zone:** Application can identify the time of the device from its setting and apply it to the game.
  Top Rake and Top Hand Live Leaderboard: Allows to see the top ranked players in the game at once.
- **Affiliate players live leaderboard:** Allows to see users in a list who has contributed the most with their hierarchies.
- **Customize Table Bots:** Players can set up their competition bot players with certain difficulty from the personalized panel.
- **Buy In Customize Scroll:** Players can buy in with customized scroll.

- **Add Chip Customize Scroll:** Players can add chips with customized scroll.
- **Check last update:** The game automatically checks for the latest updates from the server.
- **Email Configurations:** Users can easily configure and change their email according to the desire with verification of a phone number.
- **Multi Tables Timer:** The timer of each table the player is in will be shown in each separate time that can be showcased with a player profile where they can view their other cards.
- **Unique Hand Number:** Every hand in the game has a dedicated number into it.
- **Unique Table Number:** Every game table in the game has a dedicated number into it.
- **Automatic Create Same Full Tables:** Players can enjoy creating or duplicating their desired table designs that are automatically made within the system.

Table Settings
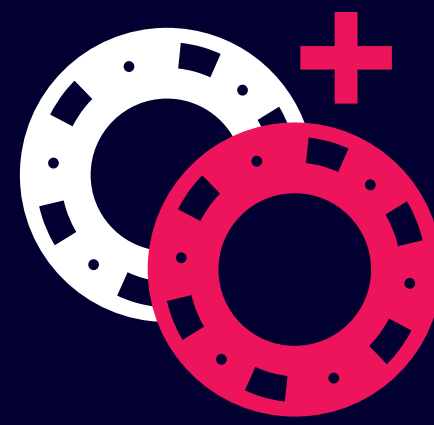

- **Auto Switch:** Automatically switch between tables as you turn comes to play on each table.

- **History Chat Mute:** Player is able to set the history of the game on chat muted from the table settings menu.

- **Players Chat Mute:** Player is able to set the chat off from the table settings menu.

- **Add Chips:** Players can add chips for the next round from the current table.

- **Video Replay:** Replaying what had happened during the 5 latest plays of the table.

- **Chat:** Players can see the chat showing the moves and the communication between them.

- **Multi Tables:** All current joined tables visible for the player to see and select them.

- **Sit Out All Tables:** You will sit out of all current tables.

- **Sit Out Next Hand:** Player will sit out until the end of the current hand.

- **Wait For BB:** Player will be waiting for the big blind.

- **Run It Two Times:** In all modes if two players agree to choose the winner two times.

- **Run it One Times:** Normally selecting one winner at the end of the game.

- **Leave:** Players can leave the game at any point using the leave button.

- **Mute Sound:** Game can be muted.

- Squeeze card for Mobile Version for Portrait mode: In start of getting a hand this setting allows a sweep up action where the player can see the cards early.

Sound effects & Game alerts

1- Audio Control: Players can toggle all game sound effects on or off, including individual settings for card dealing, chips movement, and the Time Bank, and etc, providing flexibility for immersive or quiet gameplay based on preference without the need to adjust any hardware settings.

2- Tactile Feedback: Mobile users can activate or disable vibrations for key events like receiving cards or countdowns, adding an extra layer of engagement without relying on visual or audio cues.

3- Synergized Alerts: Players can combine sound and vibration settings to create personalized alerts for important in-game moments, ensuring they never miss critical events, particularly in multi-table play.
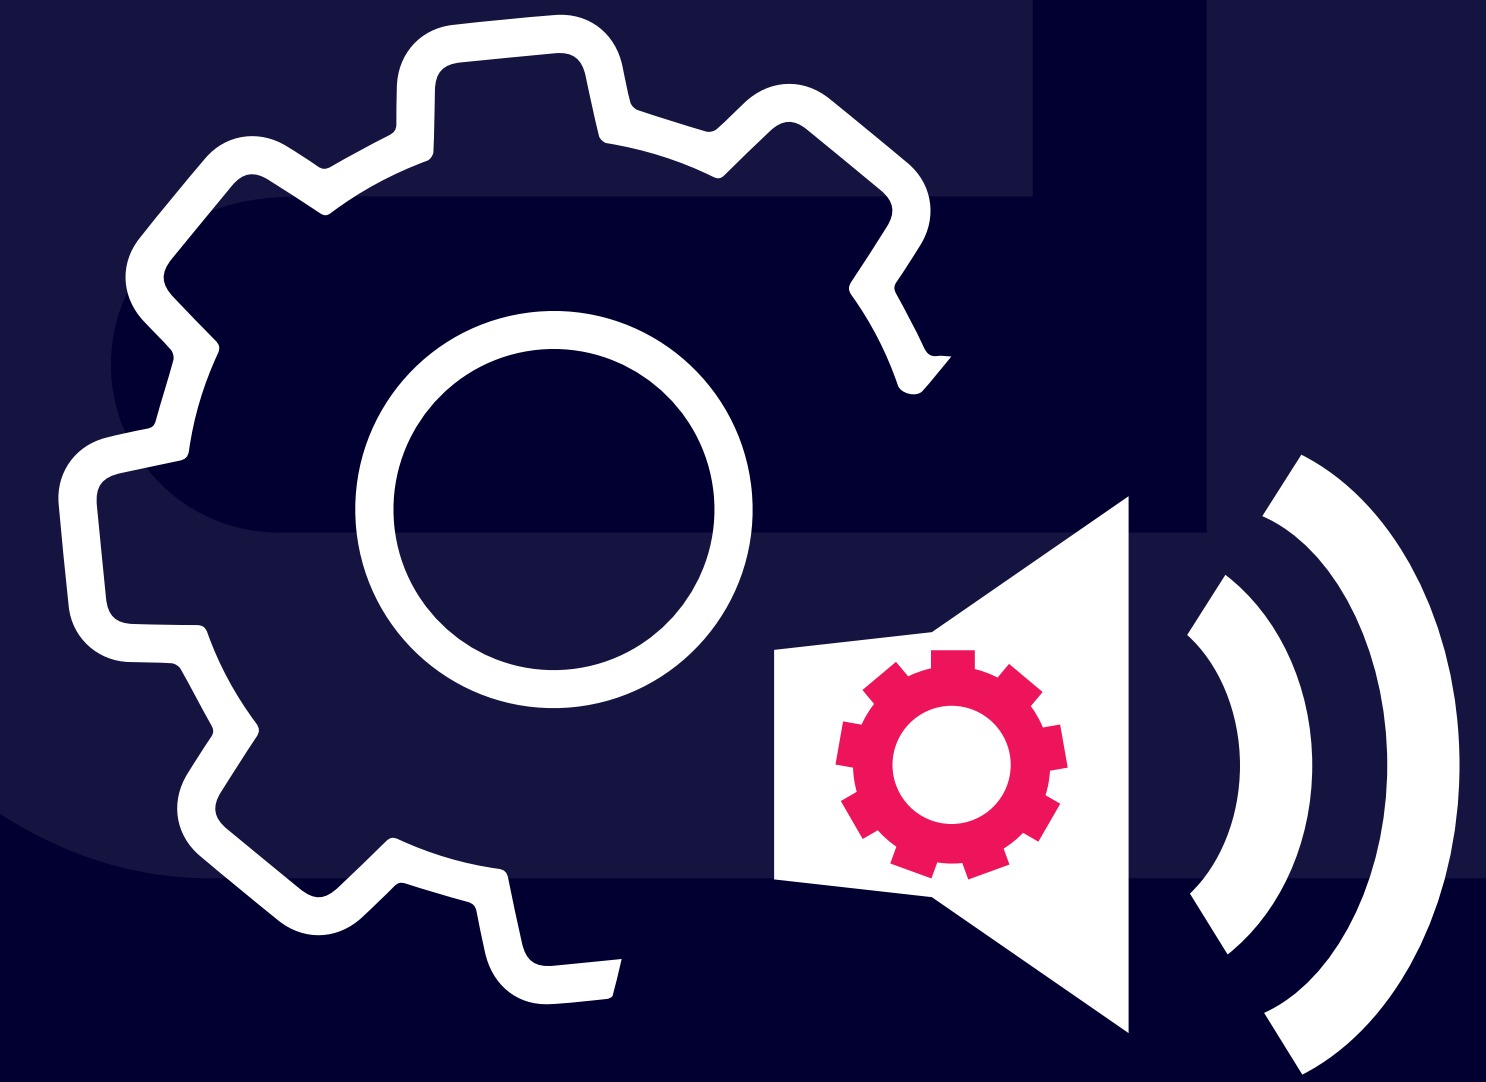

Cashier:

Explore the remarkable features that set our online poker platform apart from the rest. From innovative gameplay mechanics to intuitive user interfaces, our platform offers a wealth of features designed to enhance your gaming experience. In the cashier section, we enable connections to various bank accounts, crypto wallets, and more.

1.Automatic Cash-in: Seamlessly connect to any gateway and obtain the necessary IP information for automatically adding money to your balance. This feature also allows for adding money to other players using the panel, providing convenience and flexibility in managing funds.

2.Automatic Cash-out: Easily withdraw funds with automatic cash-out functionality, simplifying the process of accessing and transferring funds from your balance.

3.Transferring chips between players: Facilitate chip transfers between players, enabling seamless transactions and interactions within the gaming community.

4.Transaction history: Access comprehensive transaction histories containing detailed information about payments, rewards, bonuses from VIP points rack, and their top hand winning information, plus affiliation status where they can get informed where they will be affiliated when getting paid from them, providing transparency and accountability for all financial activities. And API integrated emails to inform users instantly.

5.Cryptocurrency gateways: Additional support for cryptocurrency gateways with Wallet Connect integration for a modern and secure transaction experience.
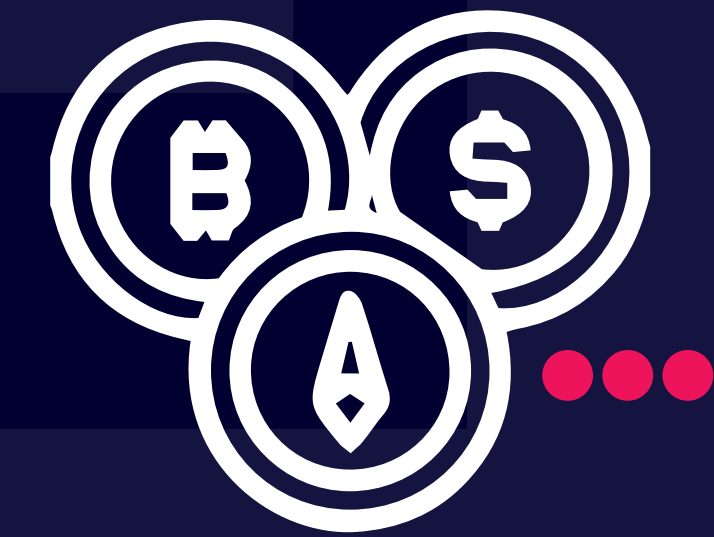

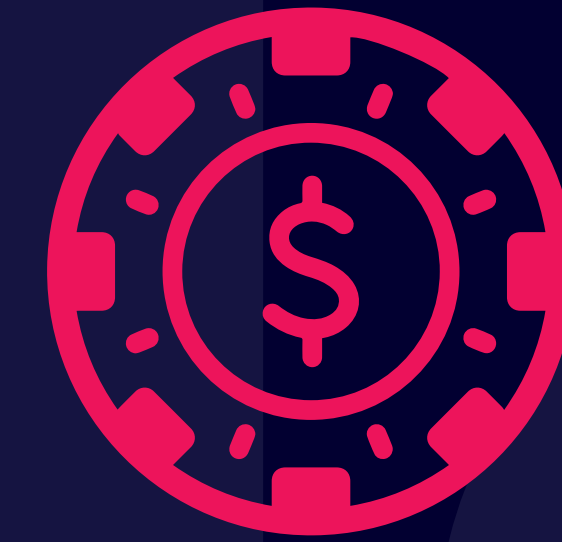

Bonus & Promotional features for agents and players

Promotional options play a pivotal role in empowering Admins to effectively manage player incentives, retention, and engagement, thereby fostering the success and growth of the gaming community.

1.Bonuses: Admins have the flexibility to set bonuses for players, tailoring rewards to specific gameplay metrics such as each hand played. This feature not only incentivizes gameplay but also encourages player activity, cultivating a dynamic and thriving gaming environment.

2.Rake back: Admins can customize rake back percentages for their players using the panel, providing a valuable incentive for continued participation and loyalty.

3.Top Rake: Recognizing the top 10 players with the highest paid rakes during a specific period, this feature promotes healthy competition and rewards players for their contributions to the community.

4.Top Hand: Admins can set rewards for the top ten players with the highest number of

games played, incentivizing consistent gameplay and fostering a competitive spirit among players.

5.VIP Points: Players who achieve a five-star rating and play a specific number of games are eligible to receive rake back rewards, enhancing player loyalty and engagement.

6.Commission Management: Admins have the flexibility to customize commission percentages for players within their subordinates, promoting fair and transparent earning opportunities for all.

7.Agent Player and Panel Agent in Admin Panel: Gain comprehensive insights into player and agent performance with detailed profiles and intuitive management tools available in the admin panel.

8.Referral Code for All Players: All players receive unique referral codes, encouraging them to actively recruit new players to
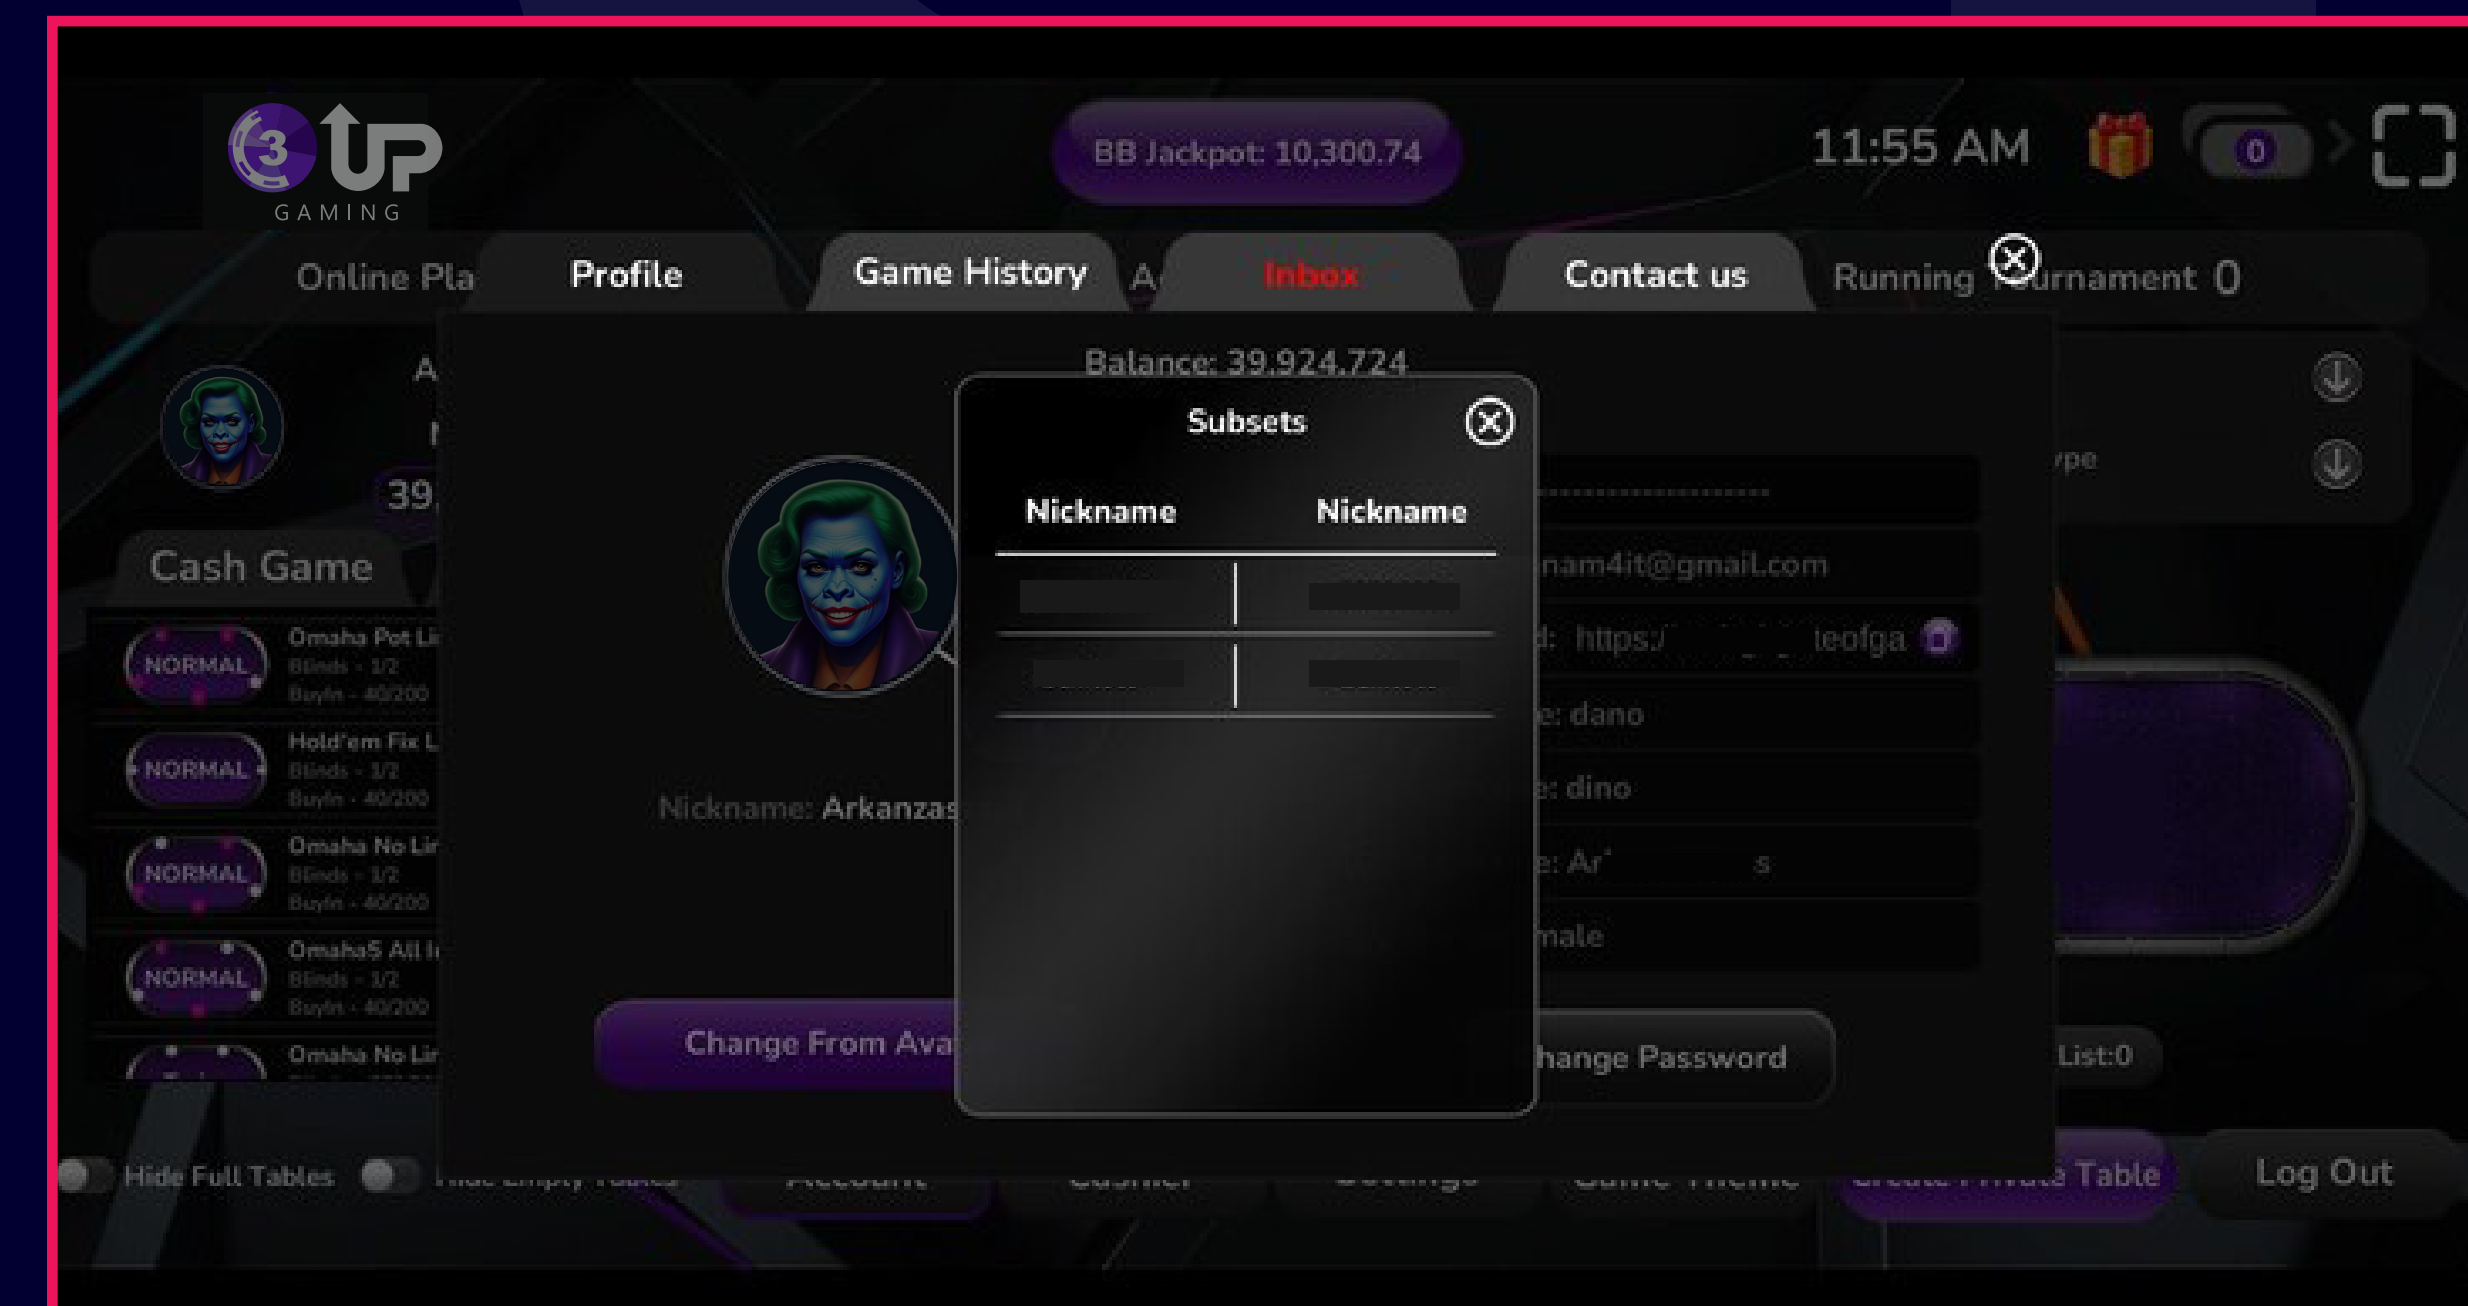

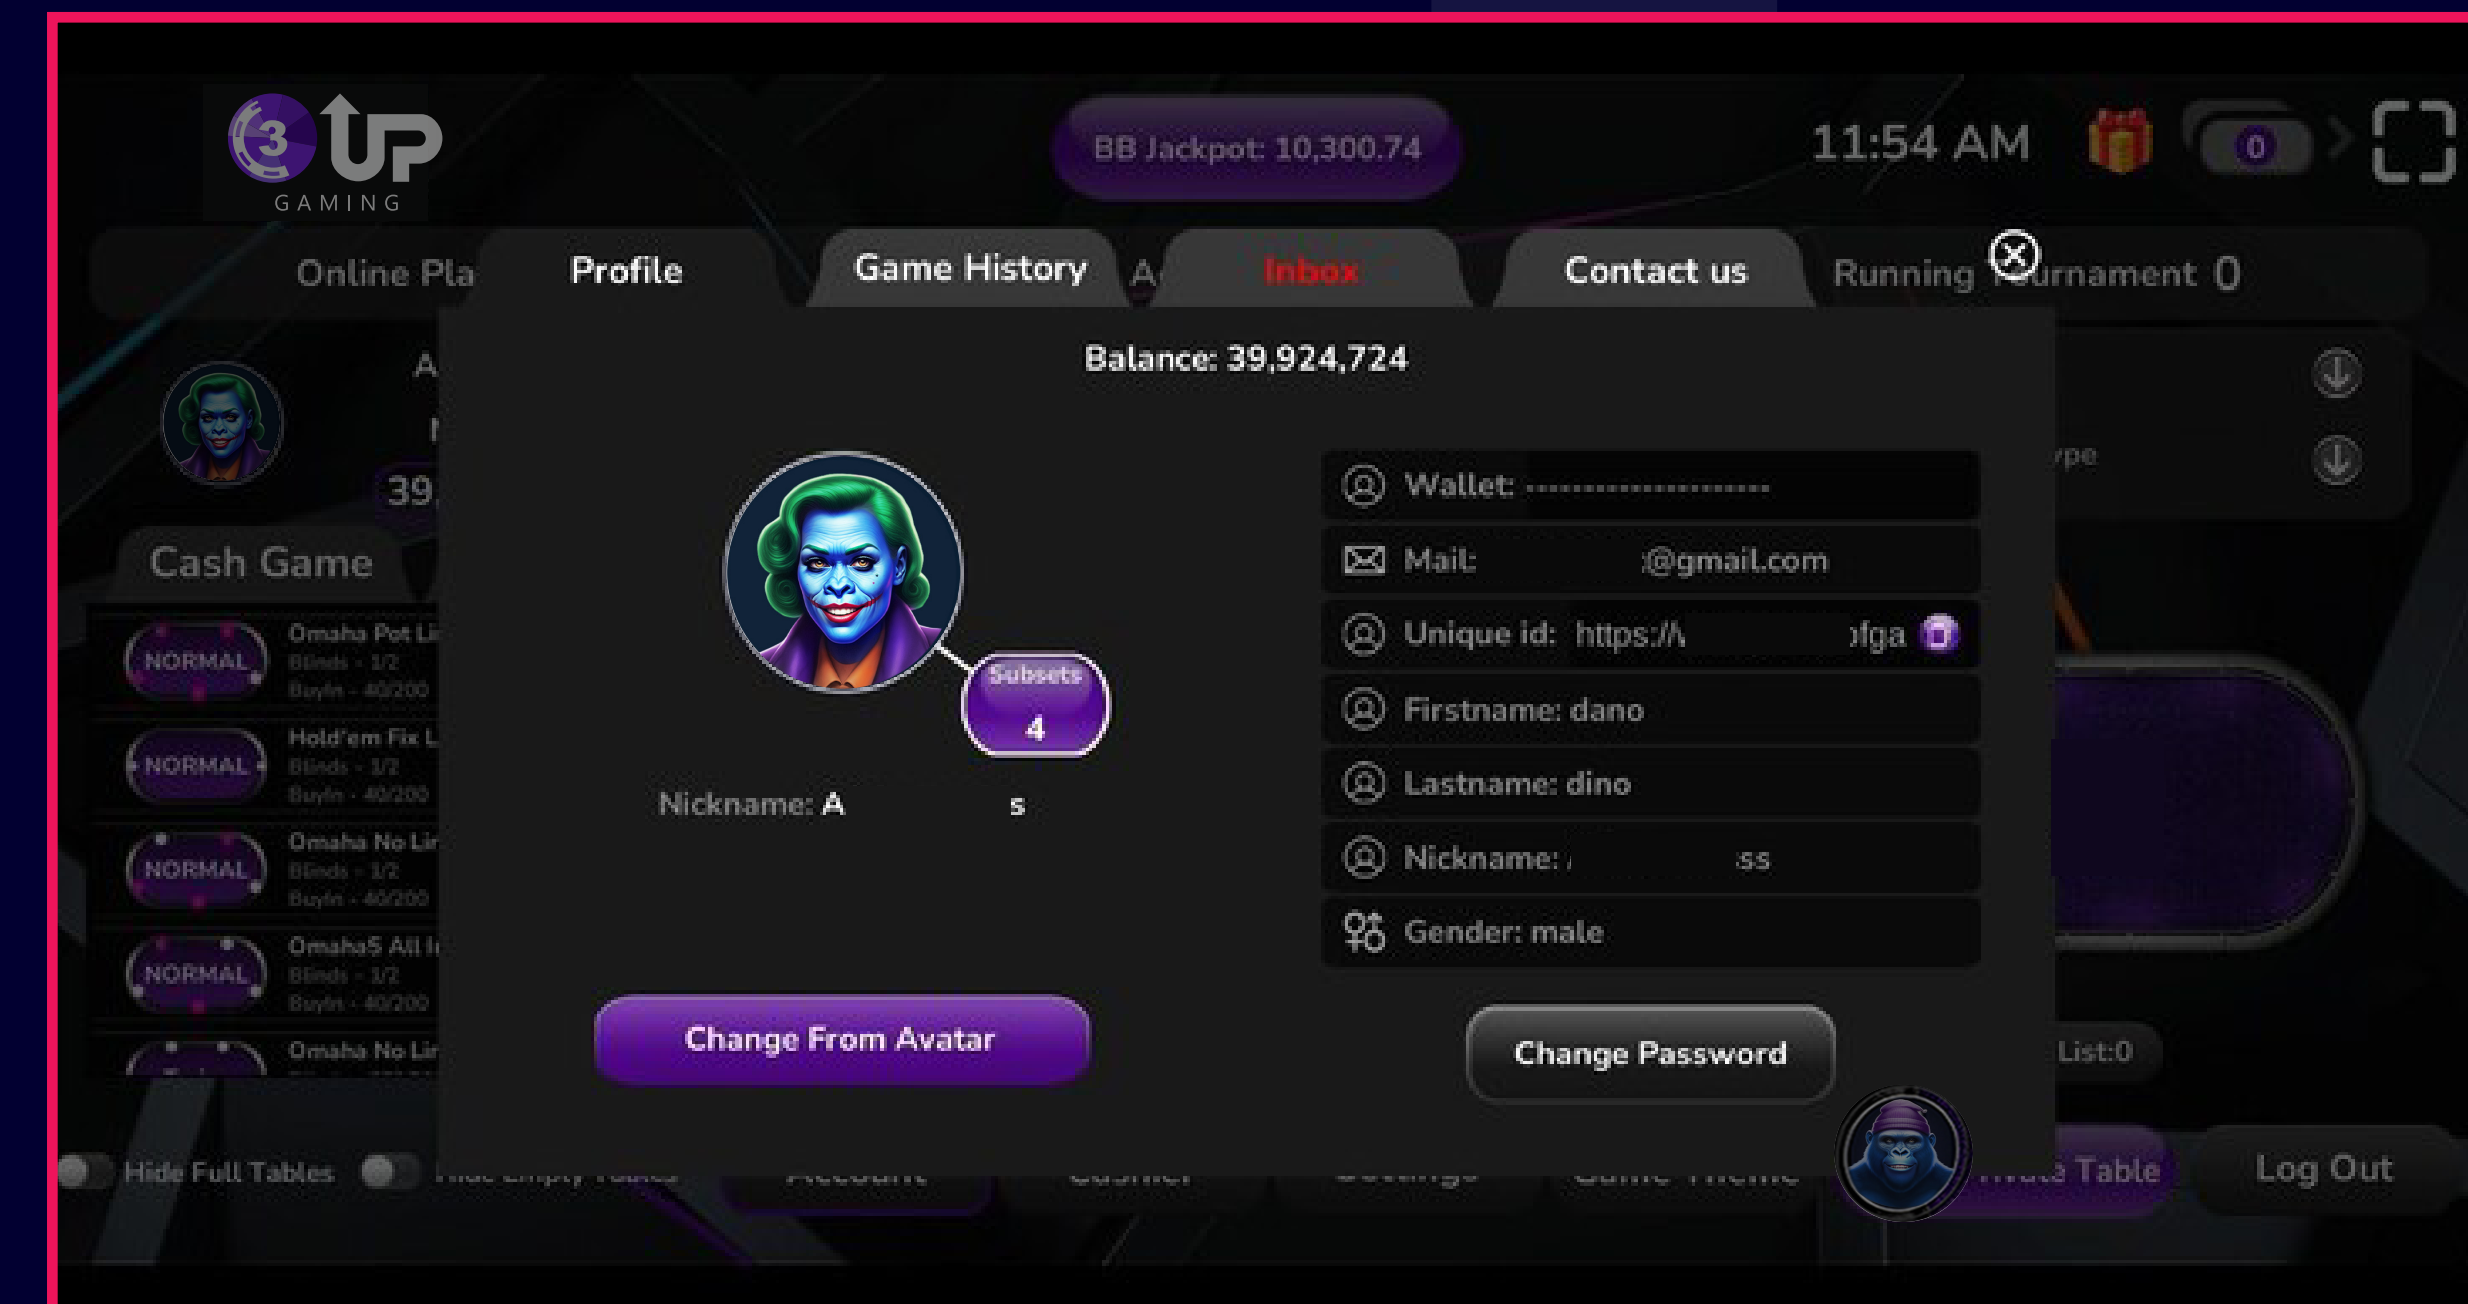

the platform and earn rewards for their contributions to the gaming community.

9. Started Chips Bonus : New players who just start can create a chip and get a bonus given the amount they deposited.

10. Reload Bonus For Any Deposit: Any despite within a certain set percentage could be added to every deposit.

11. Bad Beat JackPot: Bad Beat can be enabled on the jackpot tables.

These promotional features not only enhance player experience but also contribute to the vibrancy and growth of our gaming ecosystem, ensuring a rewarding and engaging environment for all stakeholders.

Tournaments:

Embark on thrilling tournament experiences with our diverse range of options:

● **Free Roll:** Dive into tournaments without an entry fee and compete for real prizes, offering an exciting opportunity for players to showcase their skills.

● **Freeze Out:** Test your mettle in tournaments where players are eliminated upon losing all their chips, with no re-buys or add-ons available, fostering intense competition and strategic gameplay.

● **Normal:** Engage in standard tournaments featuring various buy-in levels and enticing prize pools, catering to players of all skill levels and preferences.

Tournament Features:

Elevate your tournament experience with our array of dynamic features:

● **Rebuy and Double Rebuy:** Opt for rebuys or double rebuys during tournaments to bolster your chip stack and increase your chances of securing victory.

Add-on: Enhance your gameplay by purchasing add-ons to bolster your chip stack and fortify your position at the table.

● **Late Registration:** Seamlessly join tournaments even after they've commenced, granting players flexibility and convenience in their participation.

● **Live Leaderboard:** Stay updated with real-time tournament rankings and standings, allowing players to strategize and adapt their gameplay accordingly.

● **Show Tables and Show Ranks:** Access vital information about tournament tables and player rankings, enabling strategic planning and informed decision-making.

● **Limits Level:** Tailor tournaments to suit diverse player preferences and skill levels by setting specific limits and levels, ensuring an inclusive and engaging experience.

● **Archive Tournaments:** Reflect on past tournament glory and accomplishments with access to archived tournament histories, offering valuable insights and nostalgia.

● **Automate Move Players Between Tables:** Maintain tournament fairness and balance by automatically relocating players between tables as needed, ensuring smooth and equitable gameplay.

● **Stop and Start Game in Semi-final Tables:** Exercise control over semi-final tables by pausing and resuming games as required, facilitating optimal tournament management and progression.

Table Settings

The options below are as the same as the cash tables for tournaments:

- Auto Rebuy
- Auto Double Rebuy
- History Chat Mute
- Players Chat Mute
- Auto Add On
- Sit Out Next Hand
- Sit Out Next BB
- Squeeze Cards
- Auto Muck
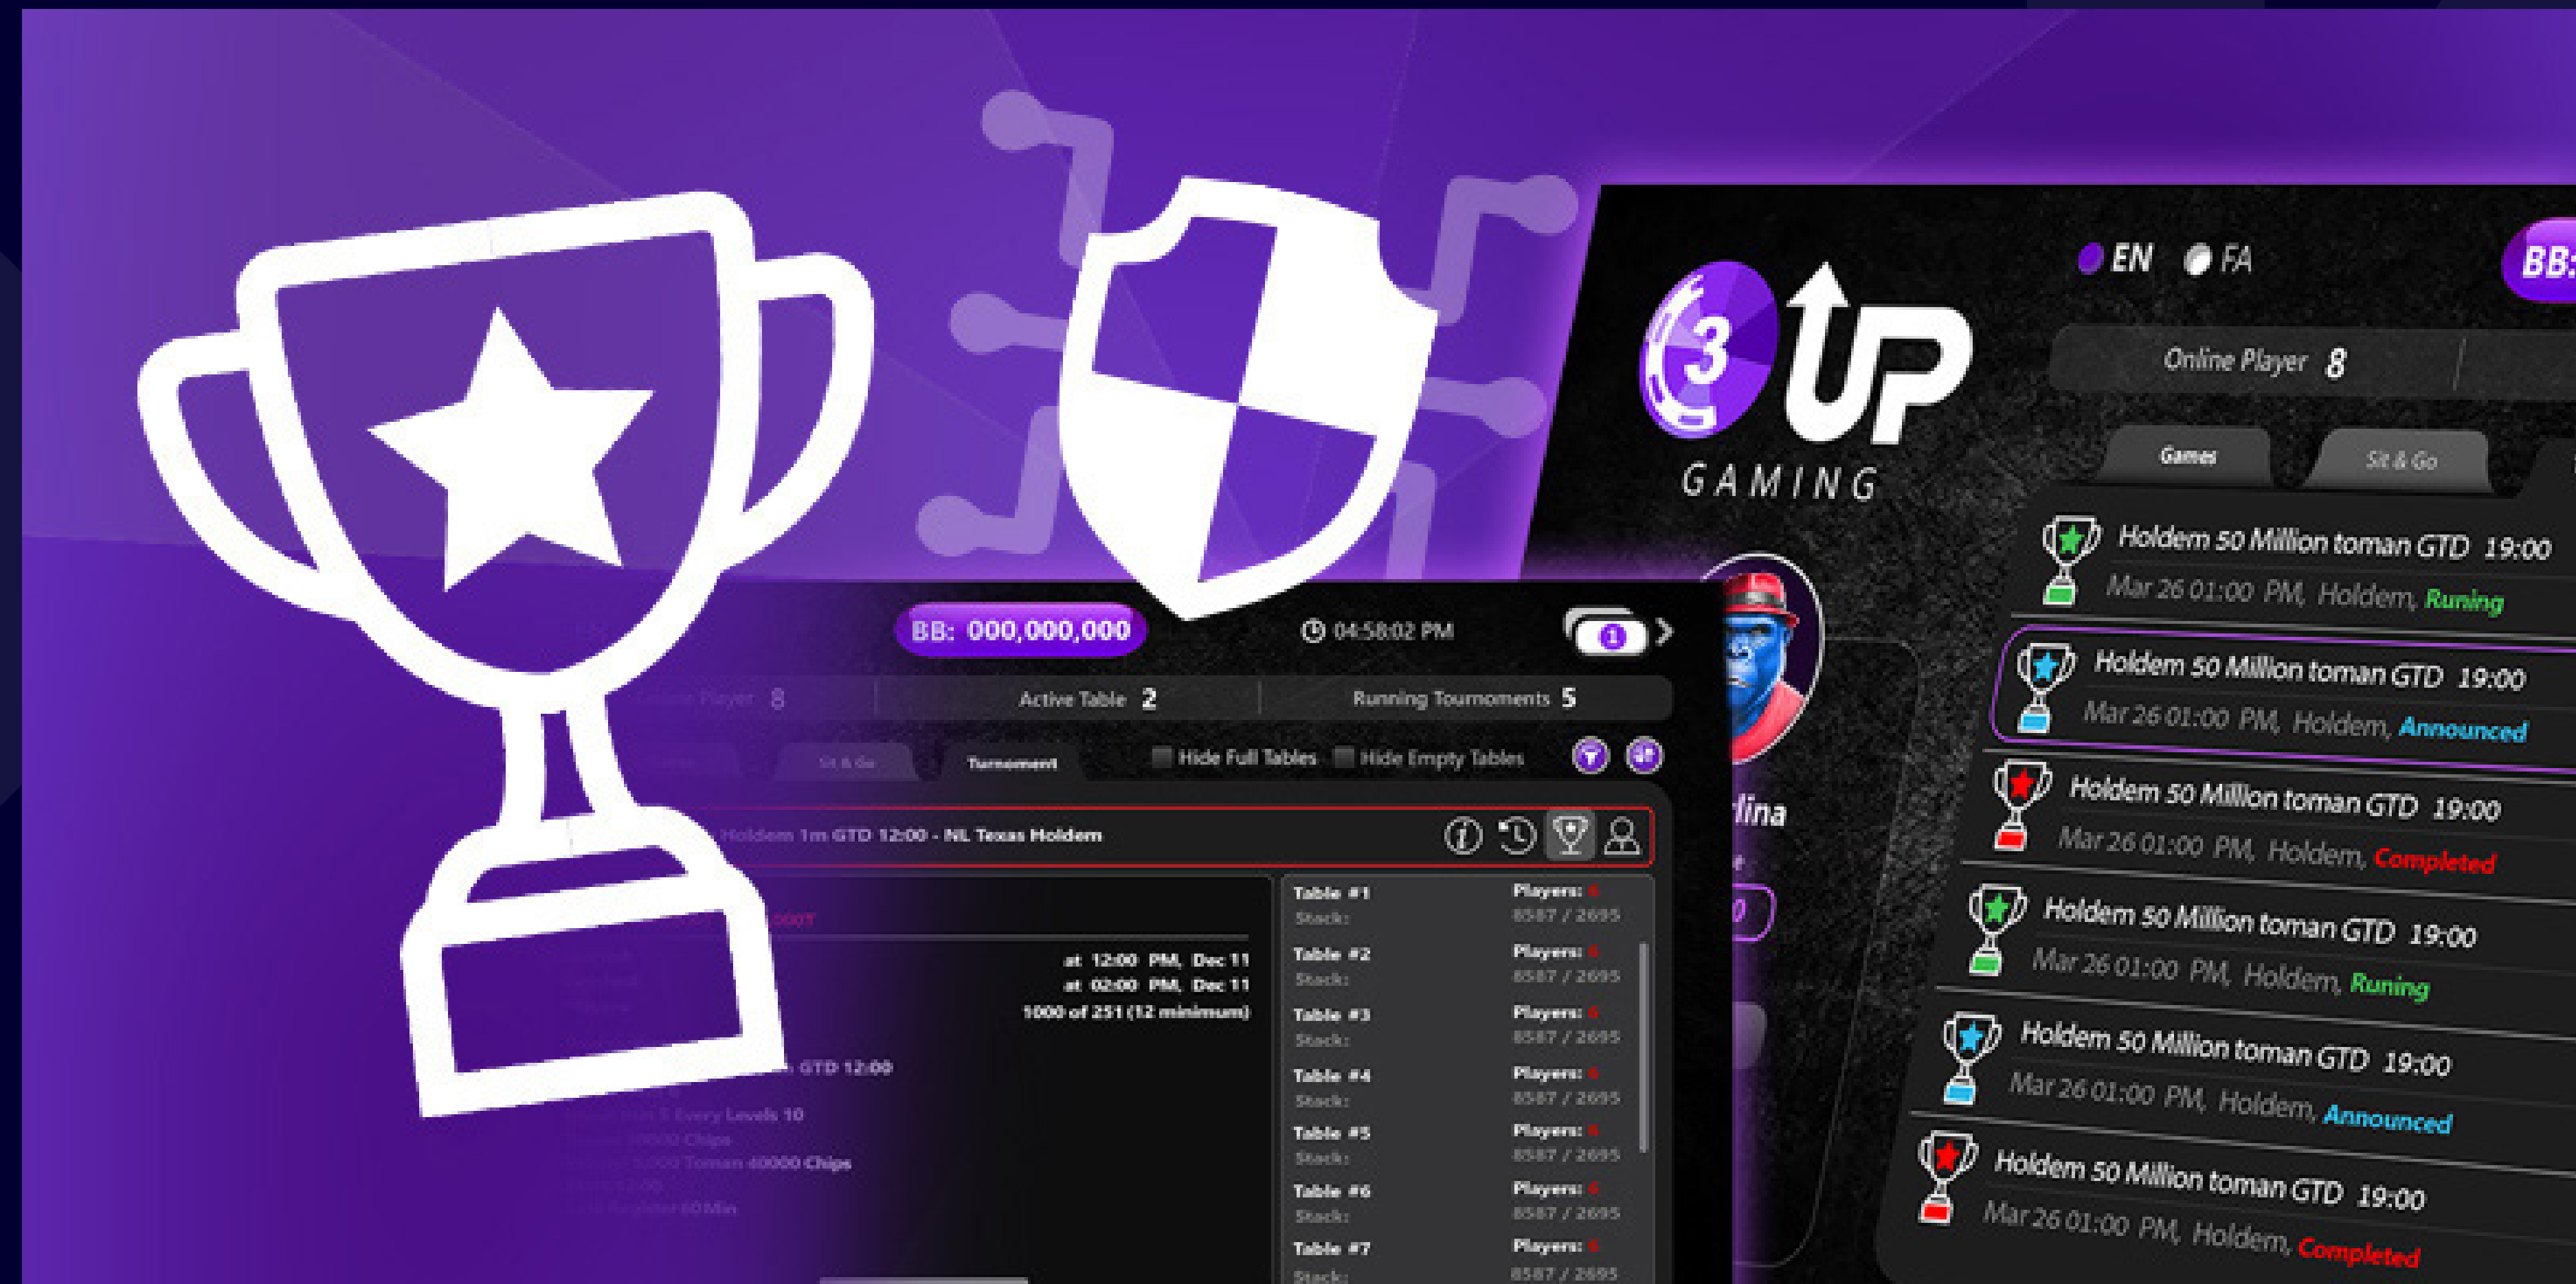

Security:

●

Ensure the utmost security and integrity of your gaming experience with our comprehensive suite of robust security measures:

●**Individual IP Tracking:** Our platform employs advanced technology to meticulously track and monitor individual IP addresses. This heightened level of surveillance not only enhances security but also promotes accountability, ensuring that every player's actions are transparent and above reproach.

●**Fraud Detection:** We are committed to maintaining a level playing field for all players. Through sophisticated fraud detection algorithms, we proactively identify and address potential instances of fraud. By matching IPs of players on the same table, we mitigate the risk of unfair advantages, preserving

the integrity and fairness of the gaming environment.

Block and Kick Players: In the event of misconduct or suspicious activity, our administrators wield the authority to take swift and decisive action. Whether it's blocking disruptive players or kicking out those who violate our terms of service, we are unwavering in our commitment to upholding a safe and fair gaming environment. This ensures that every player can enjoy a positive and enjoyable gaming experience free from interference.

● **Transaction Tracking:** Transparency and accountability are paramount in maintaining the integrity of our gaming ecosystem. Through meticulous transaction tracking, we monitor and scrutinize every financial interaction on our platform. This proactive approach not only helps prevent illegal actions but also ensures compliance with strict security protocols, safeguarding the trust and confidence of our players.

● **GPS:** Security measures like IP and GPS-based anti-collusion, hacking protections, and encryption at all levels

With these robust security measures in place, you can rest assured that your gaming experience is protected at every turn. At 3UPGAMING, we prioritize your safety and peace of mind, allowing you to focus on what truly matters – enjoying the thrill of the game.

Front End & Graphics

1.Game Themes

● Customizable backgrounds (Room, Lobby, Table, Cards)

36

Settings

The Settings Table allows admins to fine-tune game parameters like bonus percentages, game speeds, jackpot fees, and other essential configurations that shape player experience and gameplay dynamics.

General settings
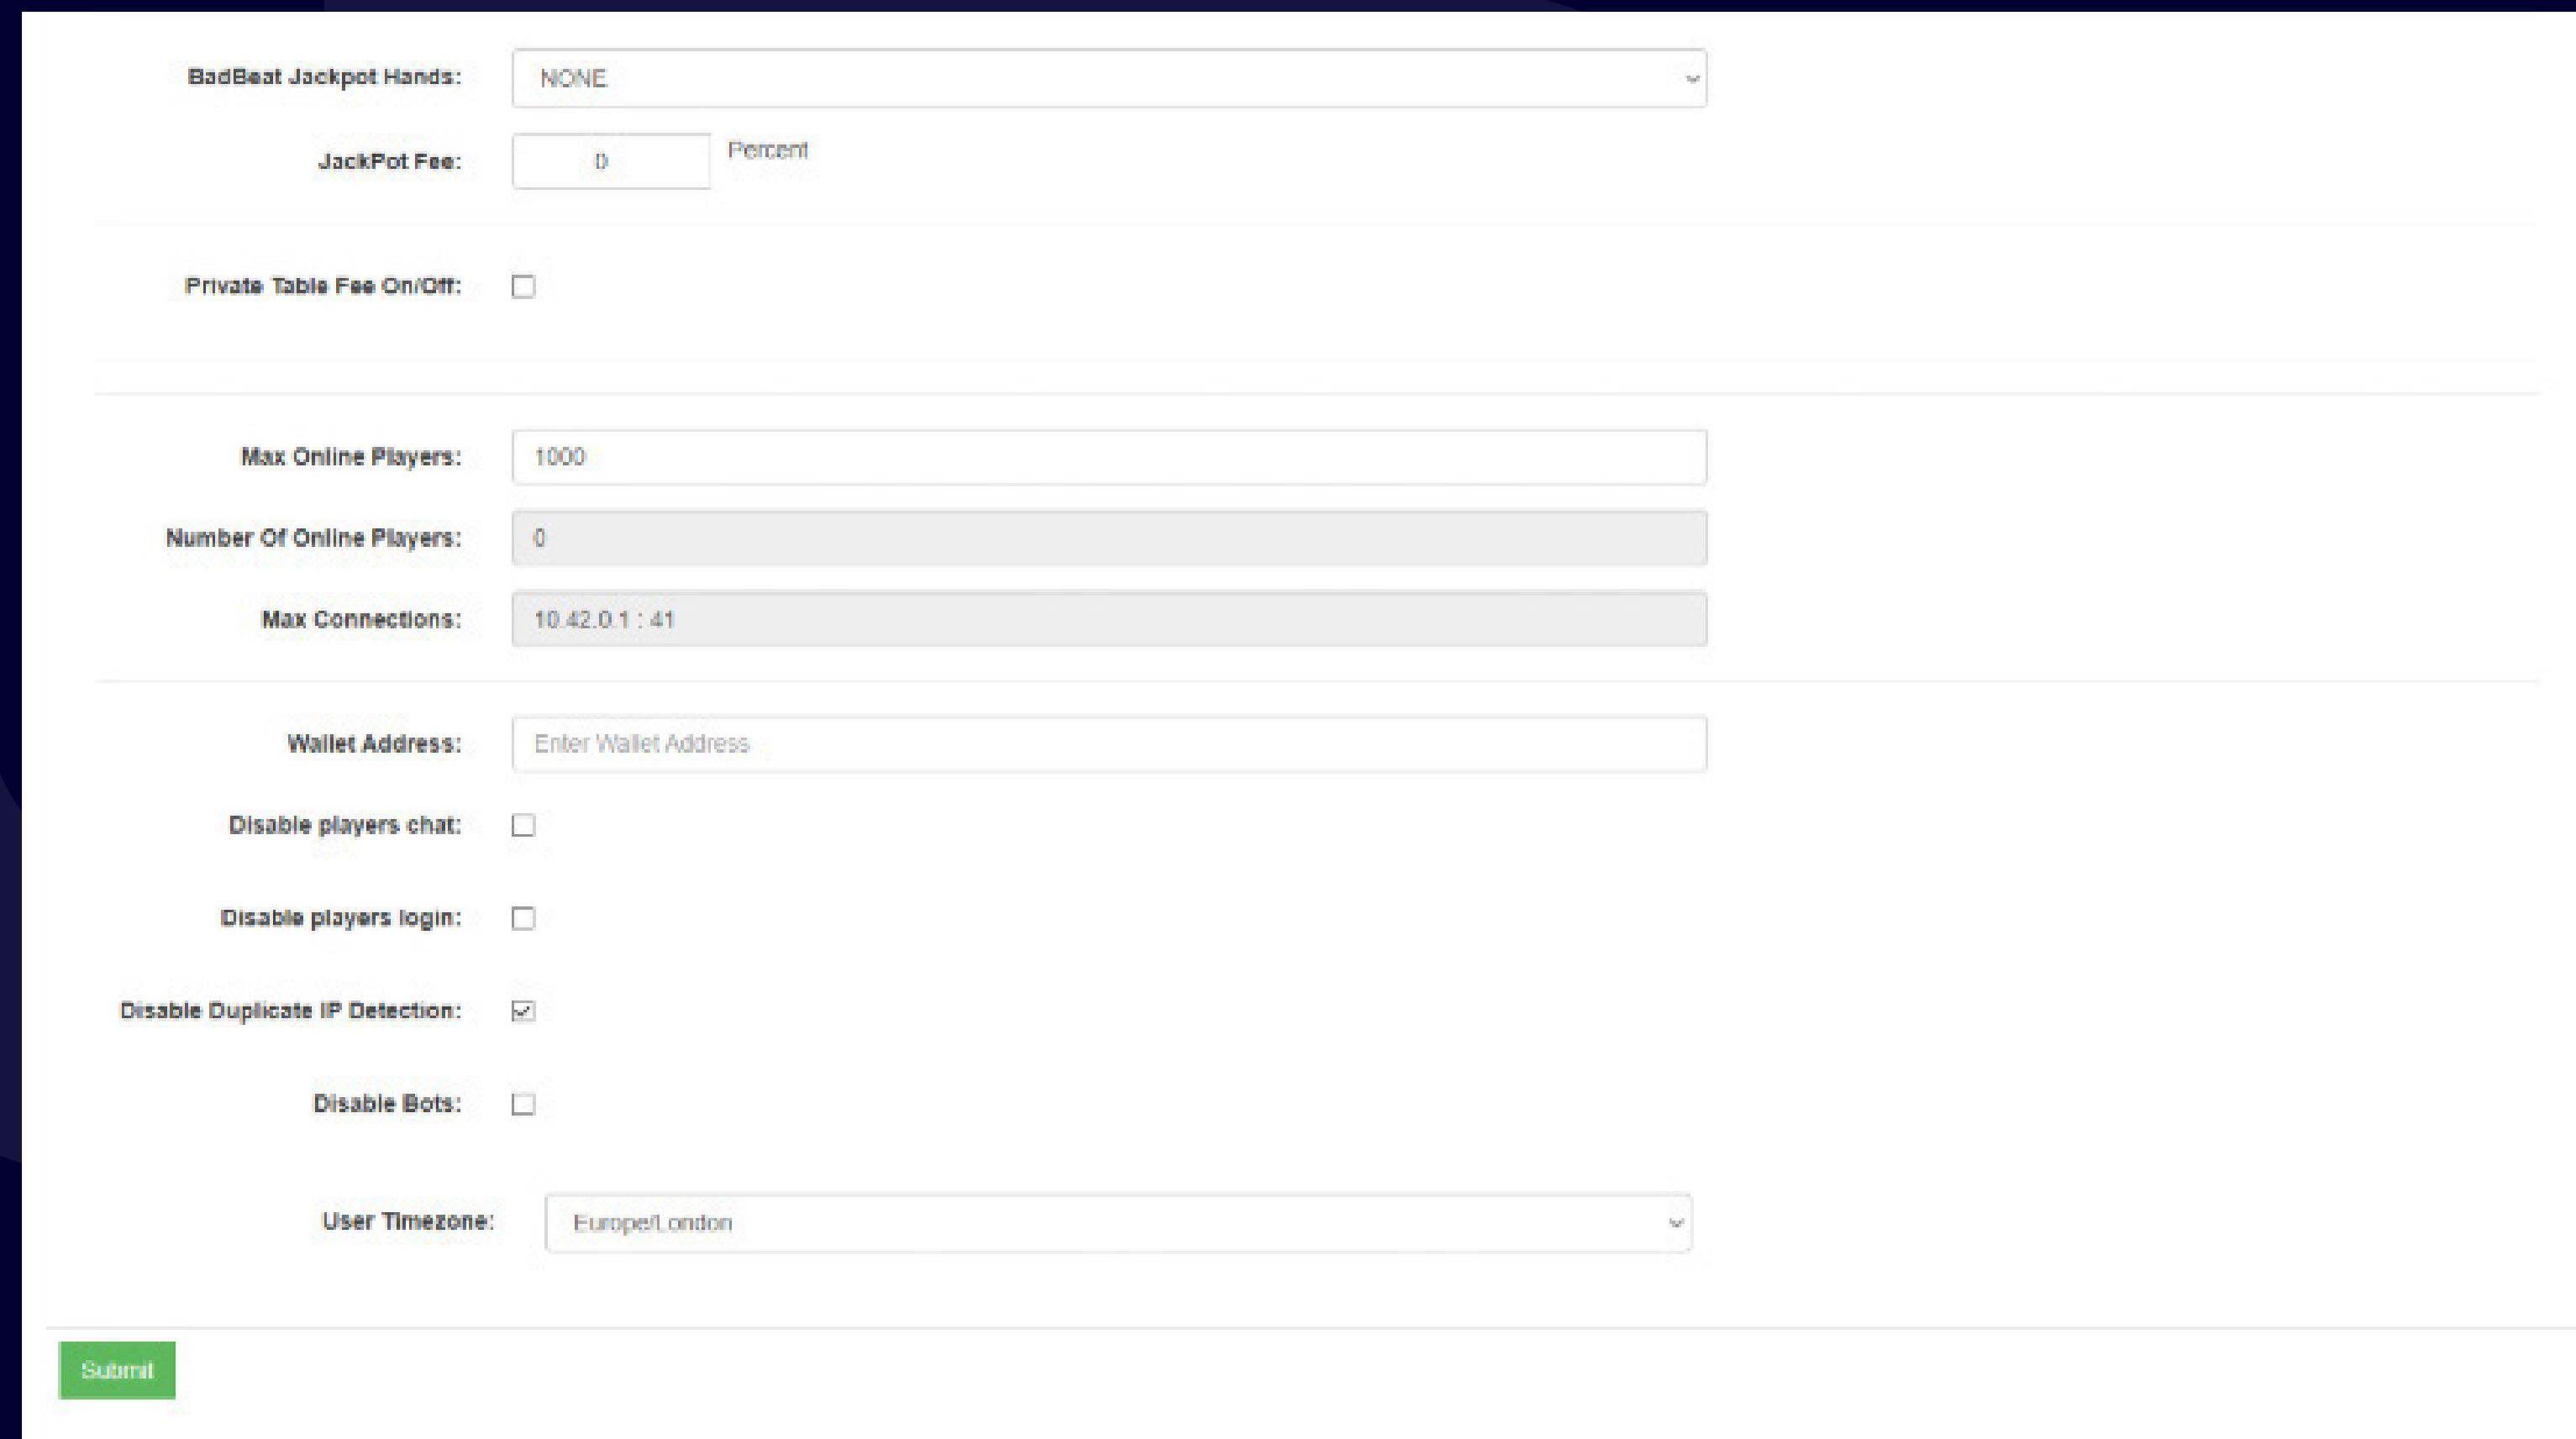

● **Theme:** The bright mode and dark mode is available to change the visuals of the admin panel itself for sensitive users.

● **Perfect Money Bonus Percentage:** The percentage of the real cash deposit from users would be gained with a
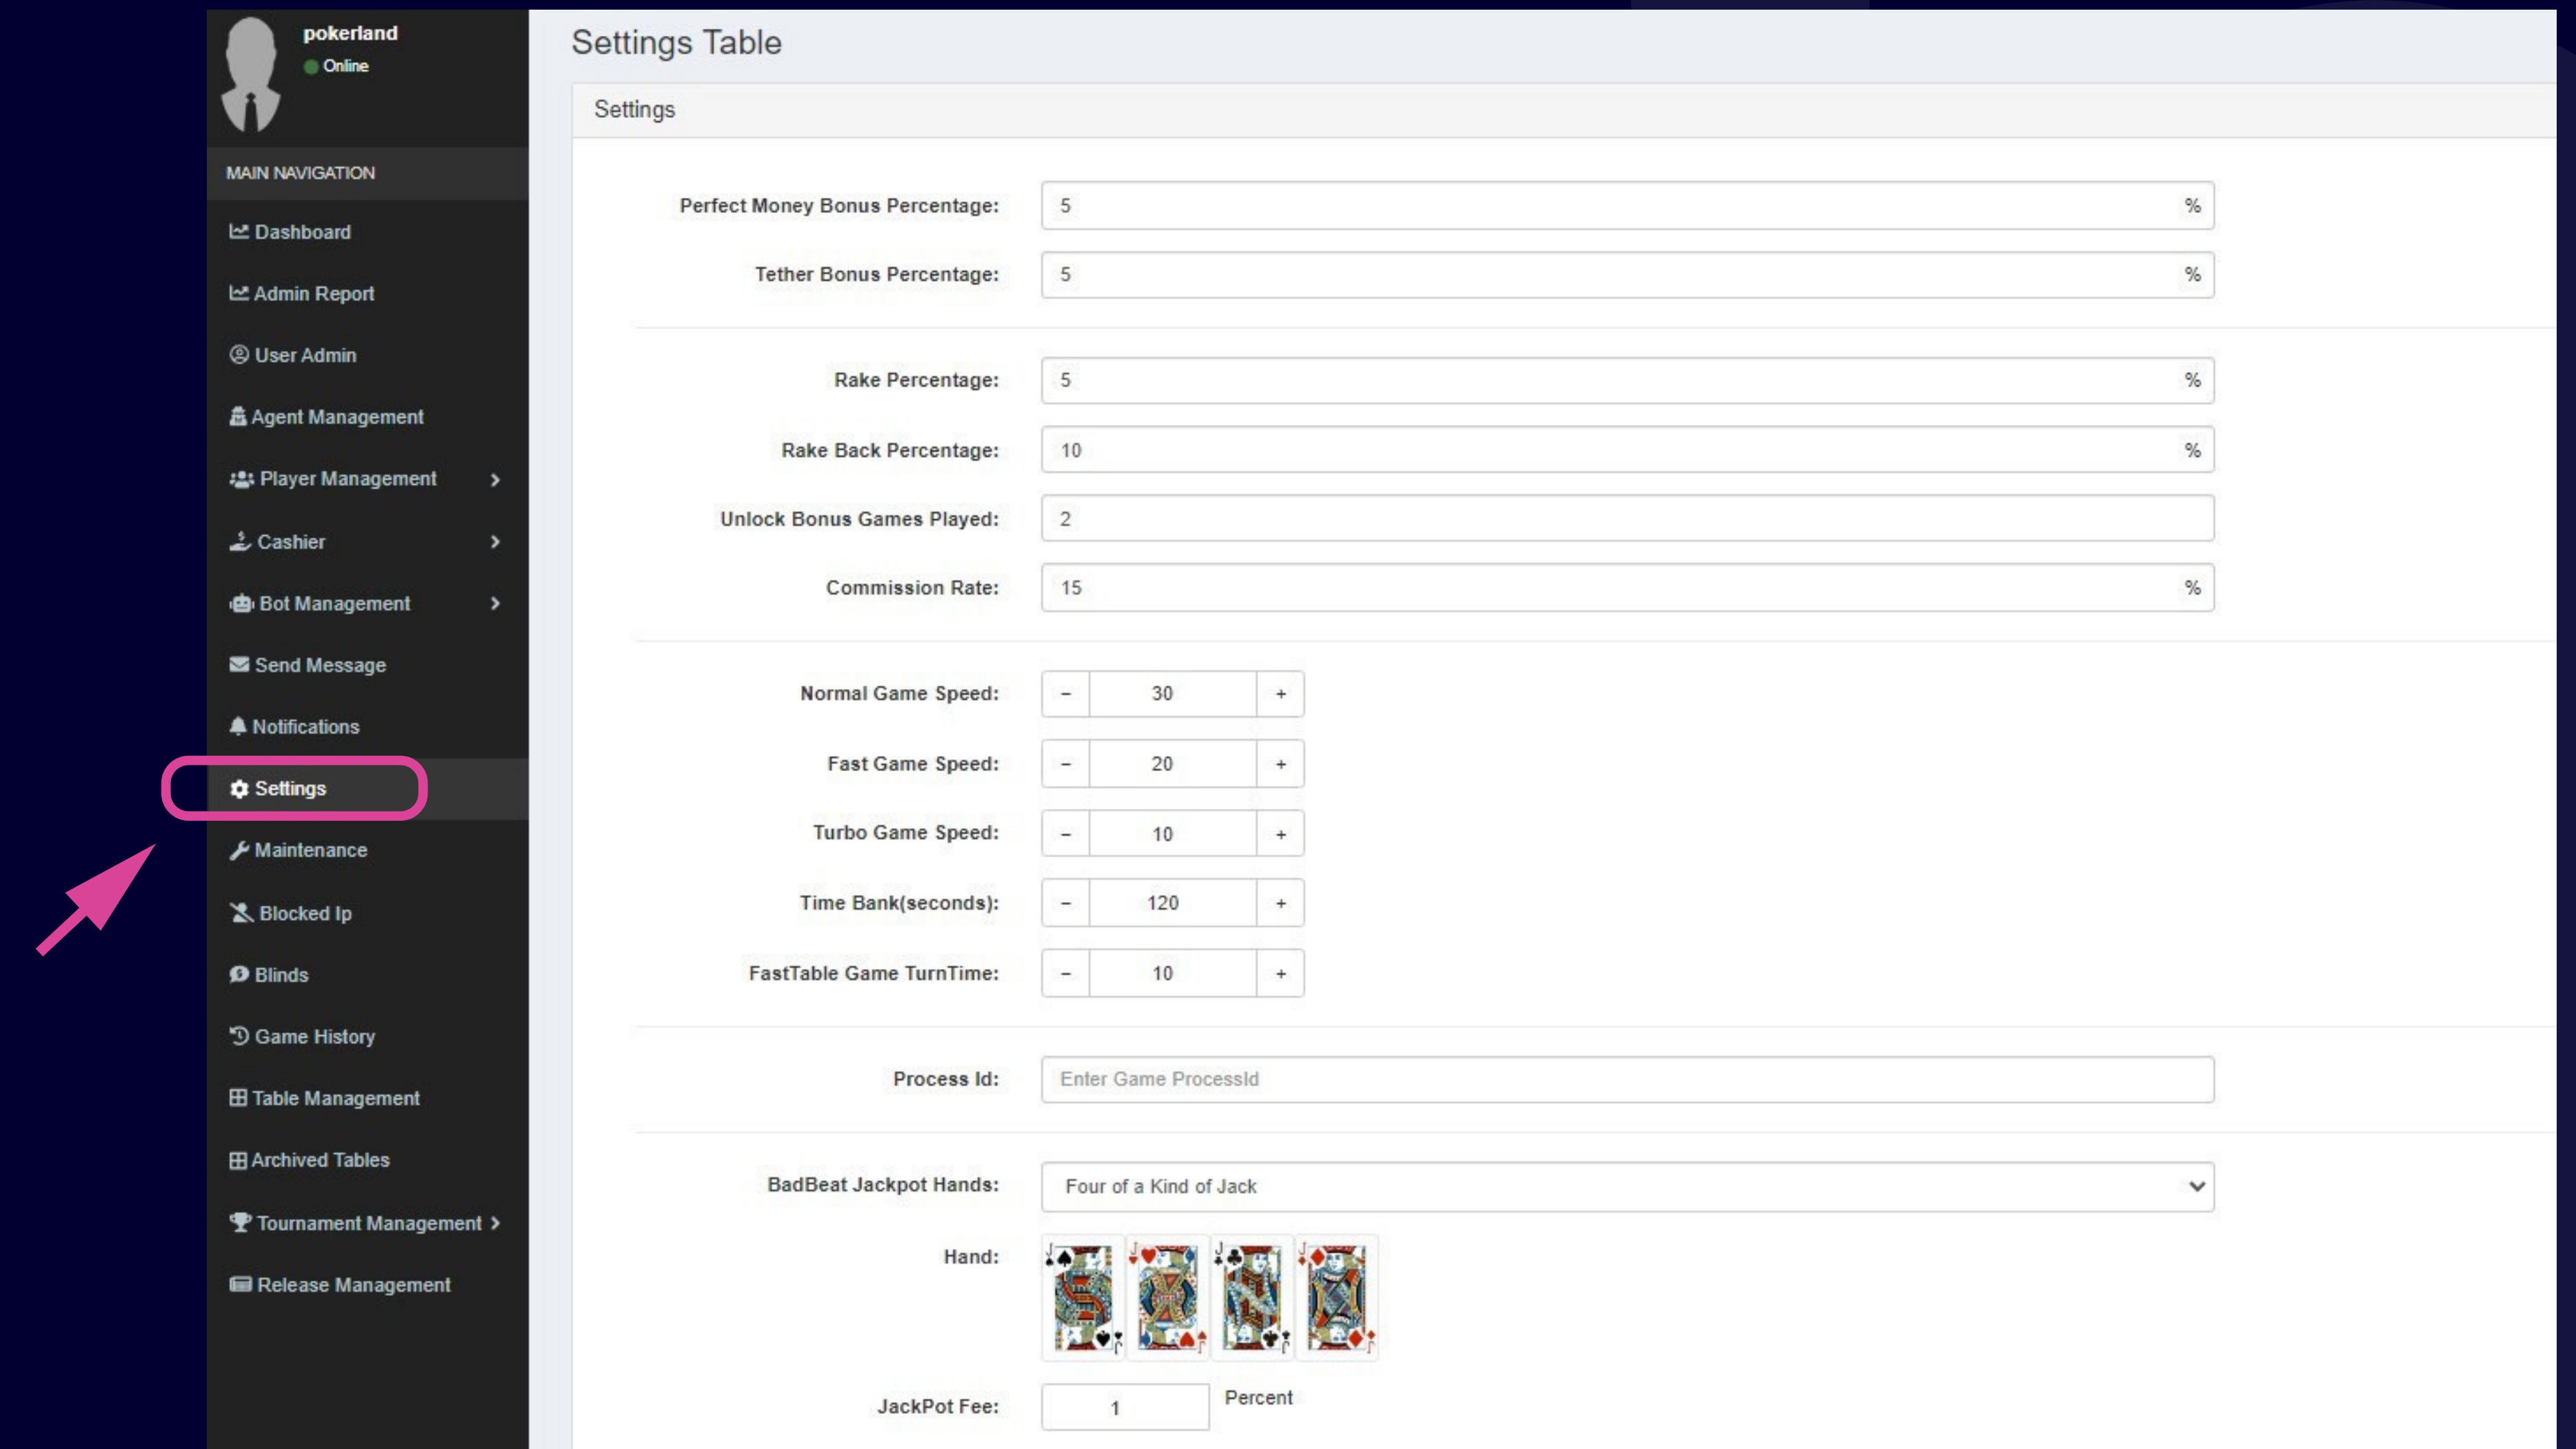

non-refundable amount within their game to encourage users to play. This amount is adjustable in the settings menu.

● **Tether Bonus Percentage:** Same as previous deposit bonus but this time with Tether, or any other cryptocurrency that is similar.

● **Rake Percentage:** The revenue as the admin or host of the platform is through the rake so it's crucial to set a specific amount first before any play.

● **Rack Back Percentage:** The rake back is the percentage that could be set to reward the winner from the rake taken from the game itself.

● **Unlock Bonus Game Played:** If the player were to be receiving bonus they should play this amount of games, for example 10 poker games to be eligible for bonus reward.

● **Commission Rate:** The rate for all agents who gain a percentage as profit from the subplayers (e.g. players who signed up under their affiliation link).

● **Started Chips:** The amount of chips which a new registered player will have. This amount is non-refundable which means it can not be withdrawn.

● **Max Online Players:** Set how many players can play at the same time on your servers.

● **Disable players login:** You can remove the game access from all players.

- **Disable Duplicate IP Detection:** Detect or allow duplicate IP to have fair gameplay.
- **User Timezone:** Set your current time zone.

- **Normal Game Speed:** Adjust the speed or pace of the Normal game table.
- **Fast Game Speed:** Adjust the speed or pace of the Fast game table.
- **Turbo Game Speed:** Adjust the speed or pace of the Turbo game table.
- **Time Bank(seconds):** The time that each player has as a resort in their turn during the whole game.
- **Disconnect time:** Allowed time for the disconnected player to rejoin the current game.
- **BadBeat Jackpot Hands:** The BB Jackpot Hands is set for a loser who has this hand or higher hand but unfortunately they have lost, so a BB Jackpot with a certain amount of percentage called JackPot Fee to be rewarded to that

particular player.

- **JackPot Fee (Percentage):** The percentage set for BadBeat Jackpot Hands to be rewarded to the loser.

- **Private Table Fee On/Off:** On the table creation tab, players can either make a new private table or not.

- **Disable players chat:** Option to disable the players chat from the game table.

- **Disable Bots:** On tables you may have bots enabled or disabled.

API settings

- **Webgl Address:** The address URL that connects the app to their web for HTML5 integration.

- **Web Site Address:** The web site address which will be connected to the lobby for players to click.

- **Telegram Address:** The Telegram address or any other social media which will be connected to the lobby for players to click.

- **Instagram Address:** The Instagram address or any other social media which will be connected to the lobby for players to click.

- **Wallet Address:** Set your 3rd party wallet address where the amount will be sent.
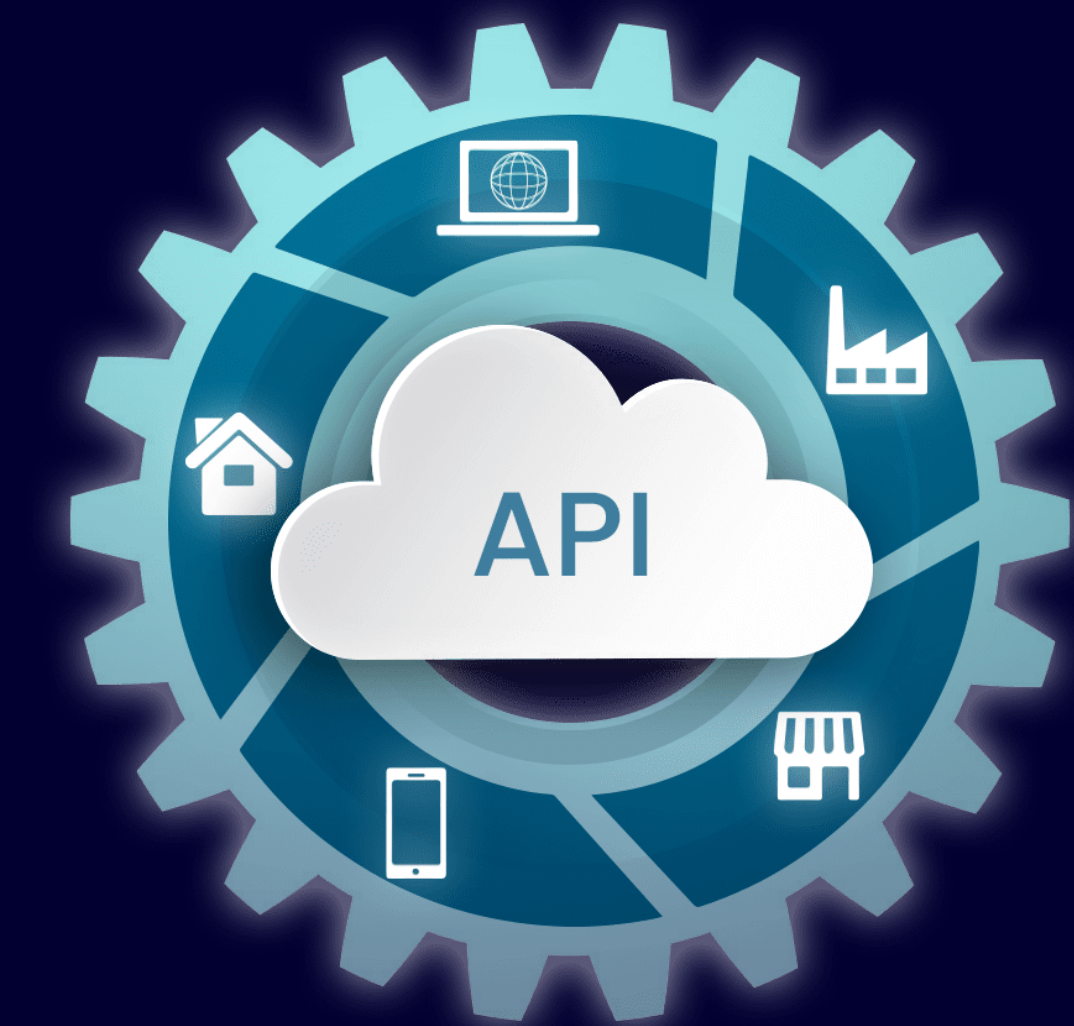

Agent Management

Agents are part of the big affiliation program where they will bring revenue with their sub players who signed up under their affiliation program, while playing themselves generating the normal revenue for the platform as well. The Agent Management section allows admins to add, edit, and manage agents, view their profiles and activity, and activate or deactivate their accounts as required.

- Add Agent
- Edit Agent
- Agent's Profile same as Player Profile
- Agent's player
- Active or Deactivate

Agent Panel

The Agent Panel provides reports on agent performance, including total players and games handled by agents, offering a clear view of their contributions to the platform.

- Agent Report
- My Agent
- My Players
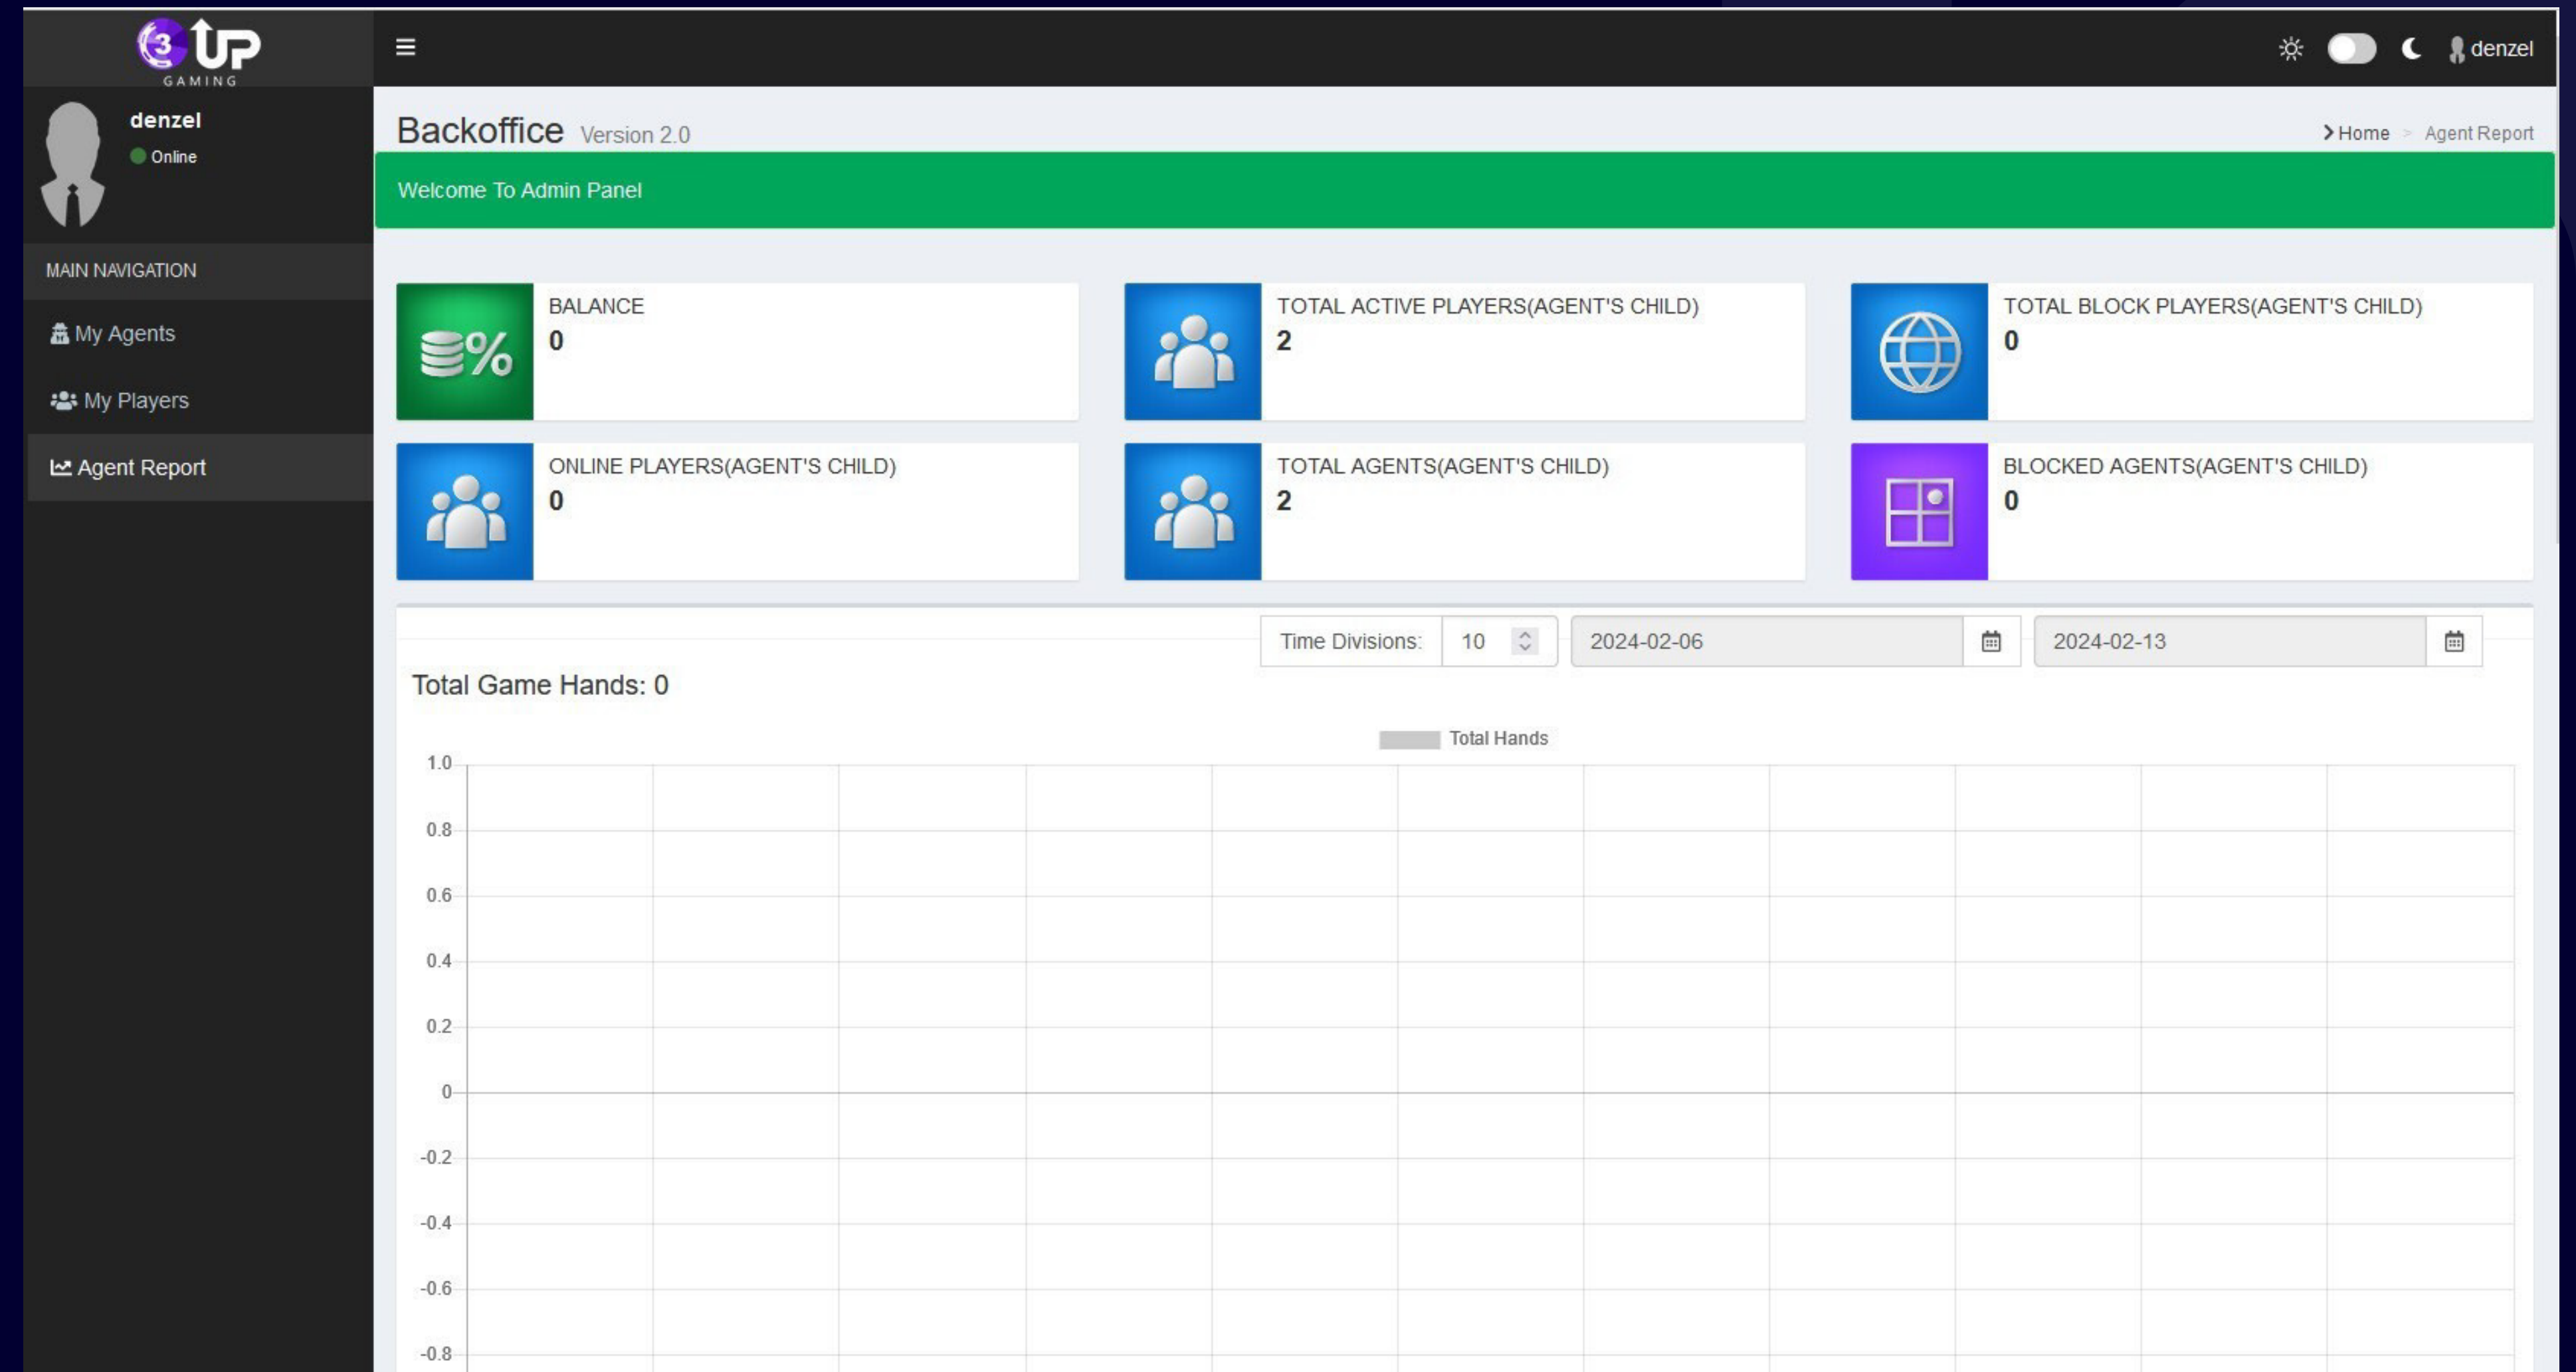

Player Management

This section enables full player management, including the ability to add chips, edit profiles, block players, and review transaction, game, and login histories, ensuring a comprehensive view of player activities.

1-All Player

The All Players section allows admins to manage players by adding chips, editing player details, blocking players when necessary, and viewing complete player profiles, ensuring effective control over player activities and account management on the platform.

- ● Transaction History of Player
- ● Game History of Player
- ● Login History
- ● Block History
- ● Send Message

2-Online Player

The Online Player section displays real-time data on currently active players, offering insights into who is online, their activity levels, table status, money amount, and allowing for immediate intervention if necessary.
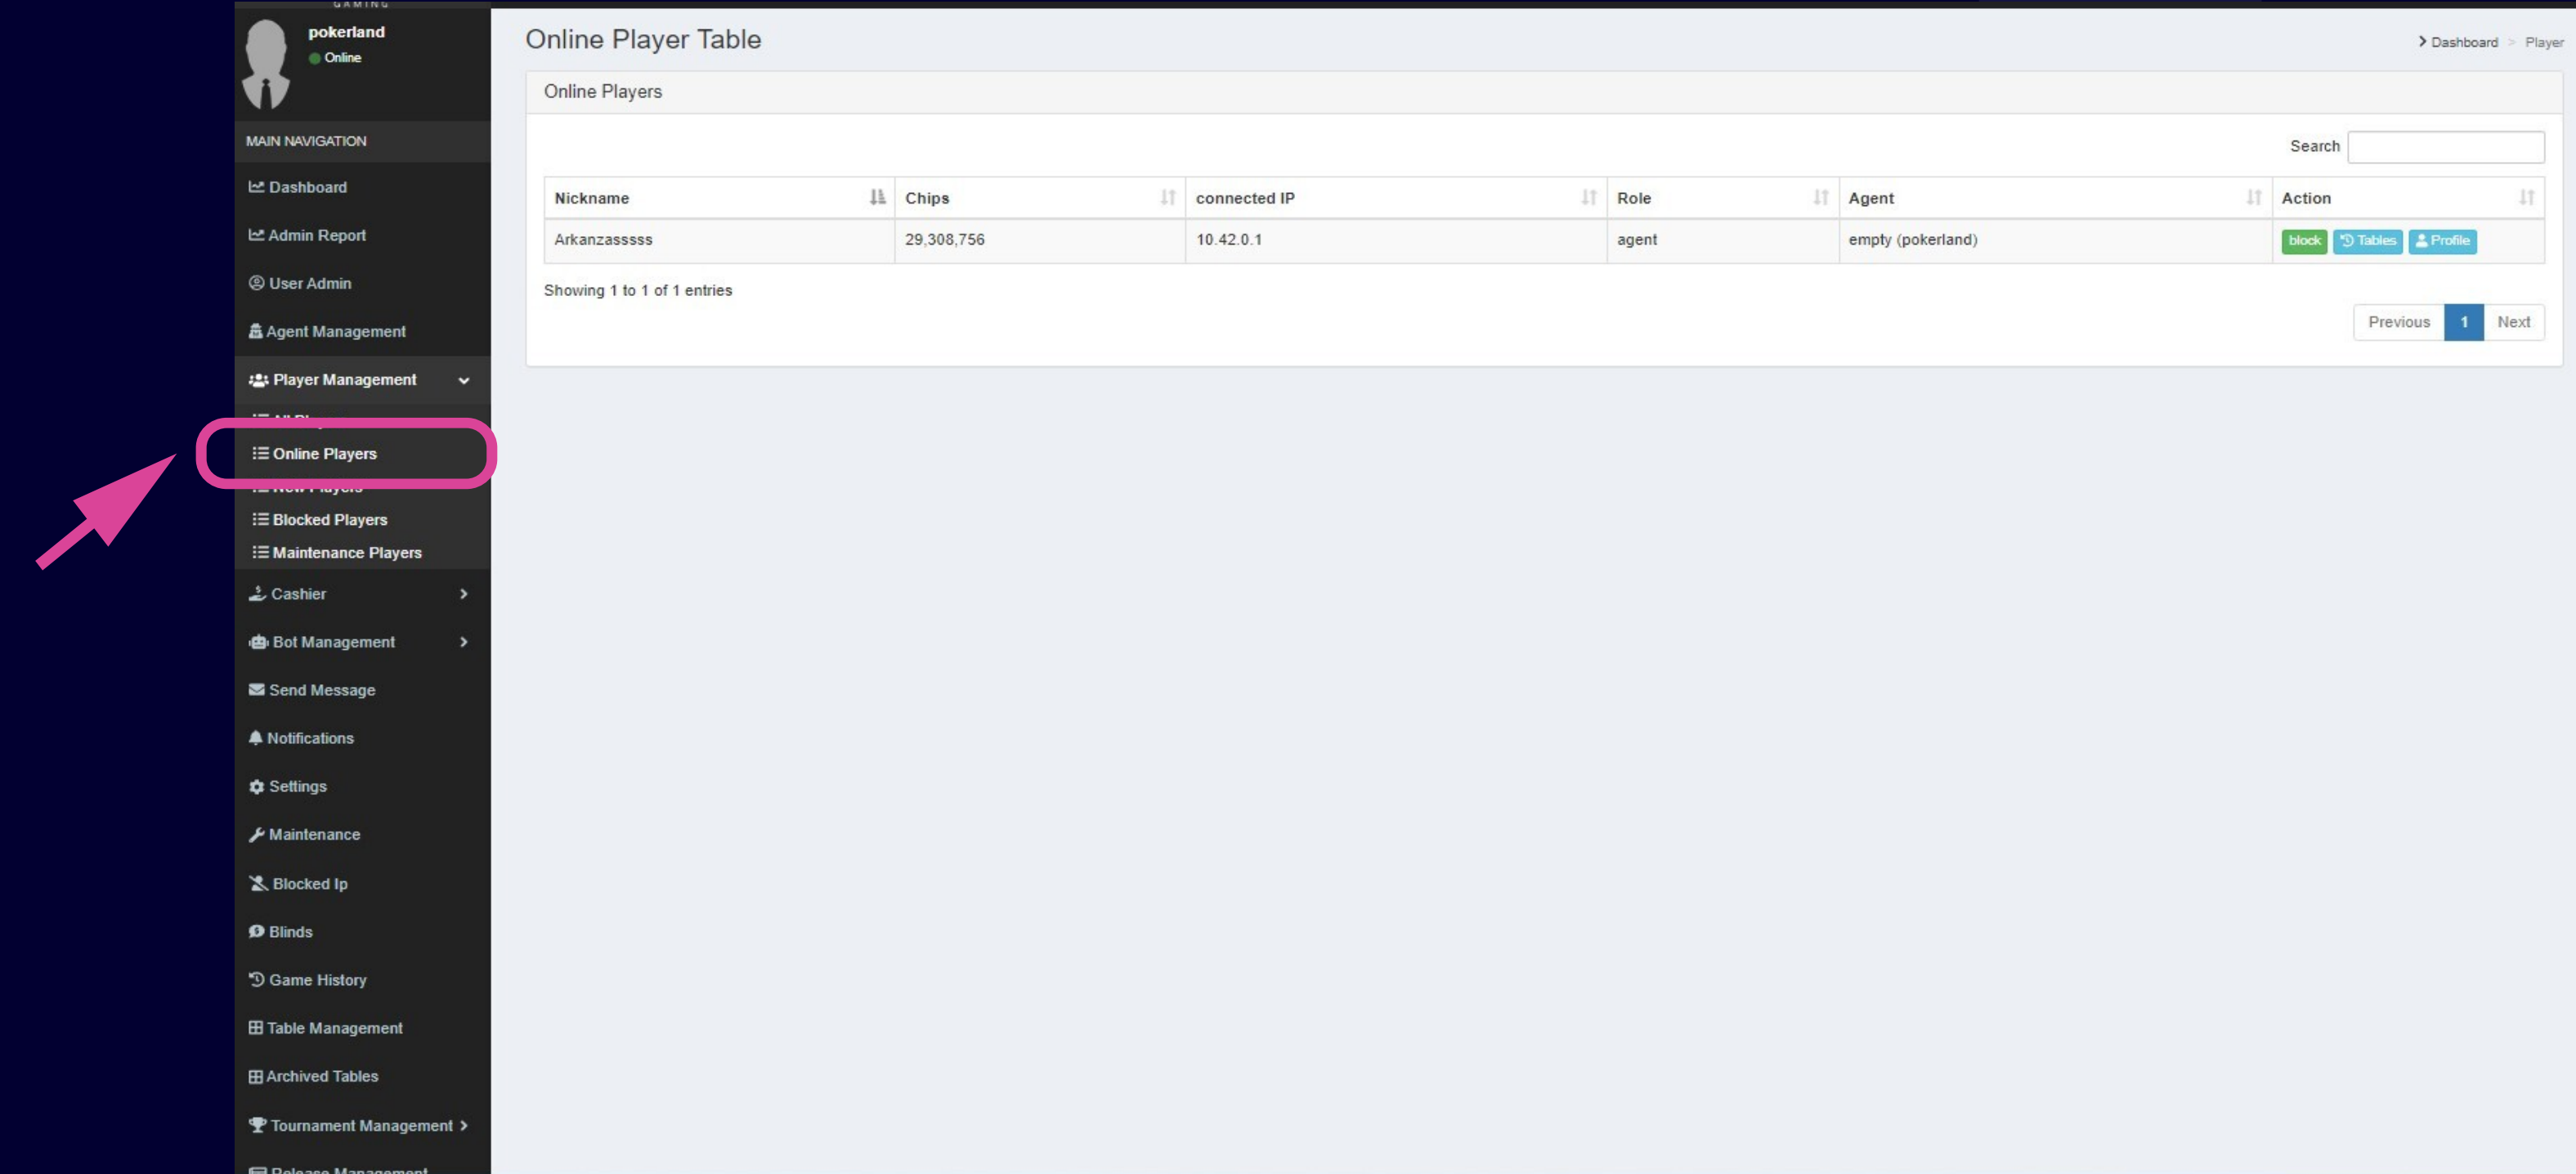

3. New Players

This section provides a dedicated table for tracking new players, giving admins an easy way to monitor recent sign-ups and their initial activities on the platform. Also allowing the admin to not allow user to cash out until they are approved.
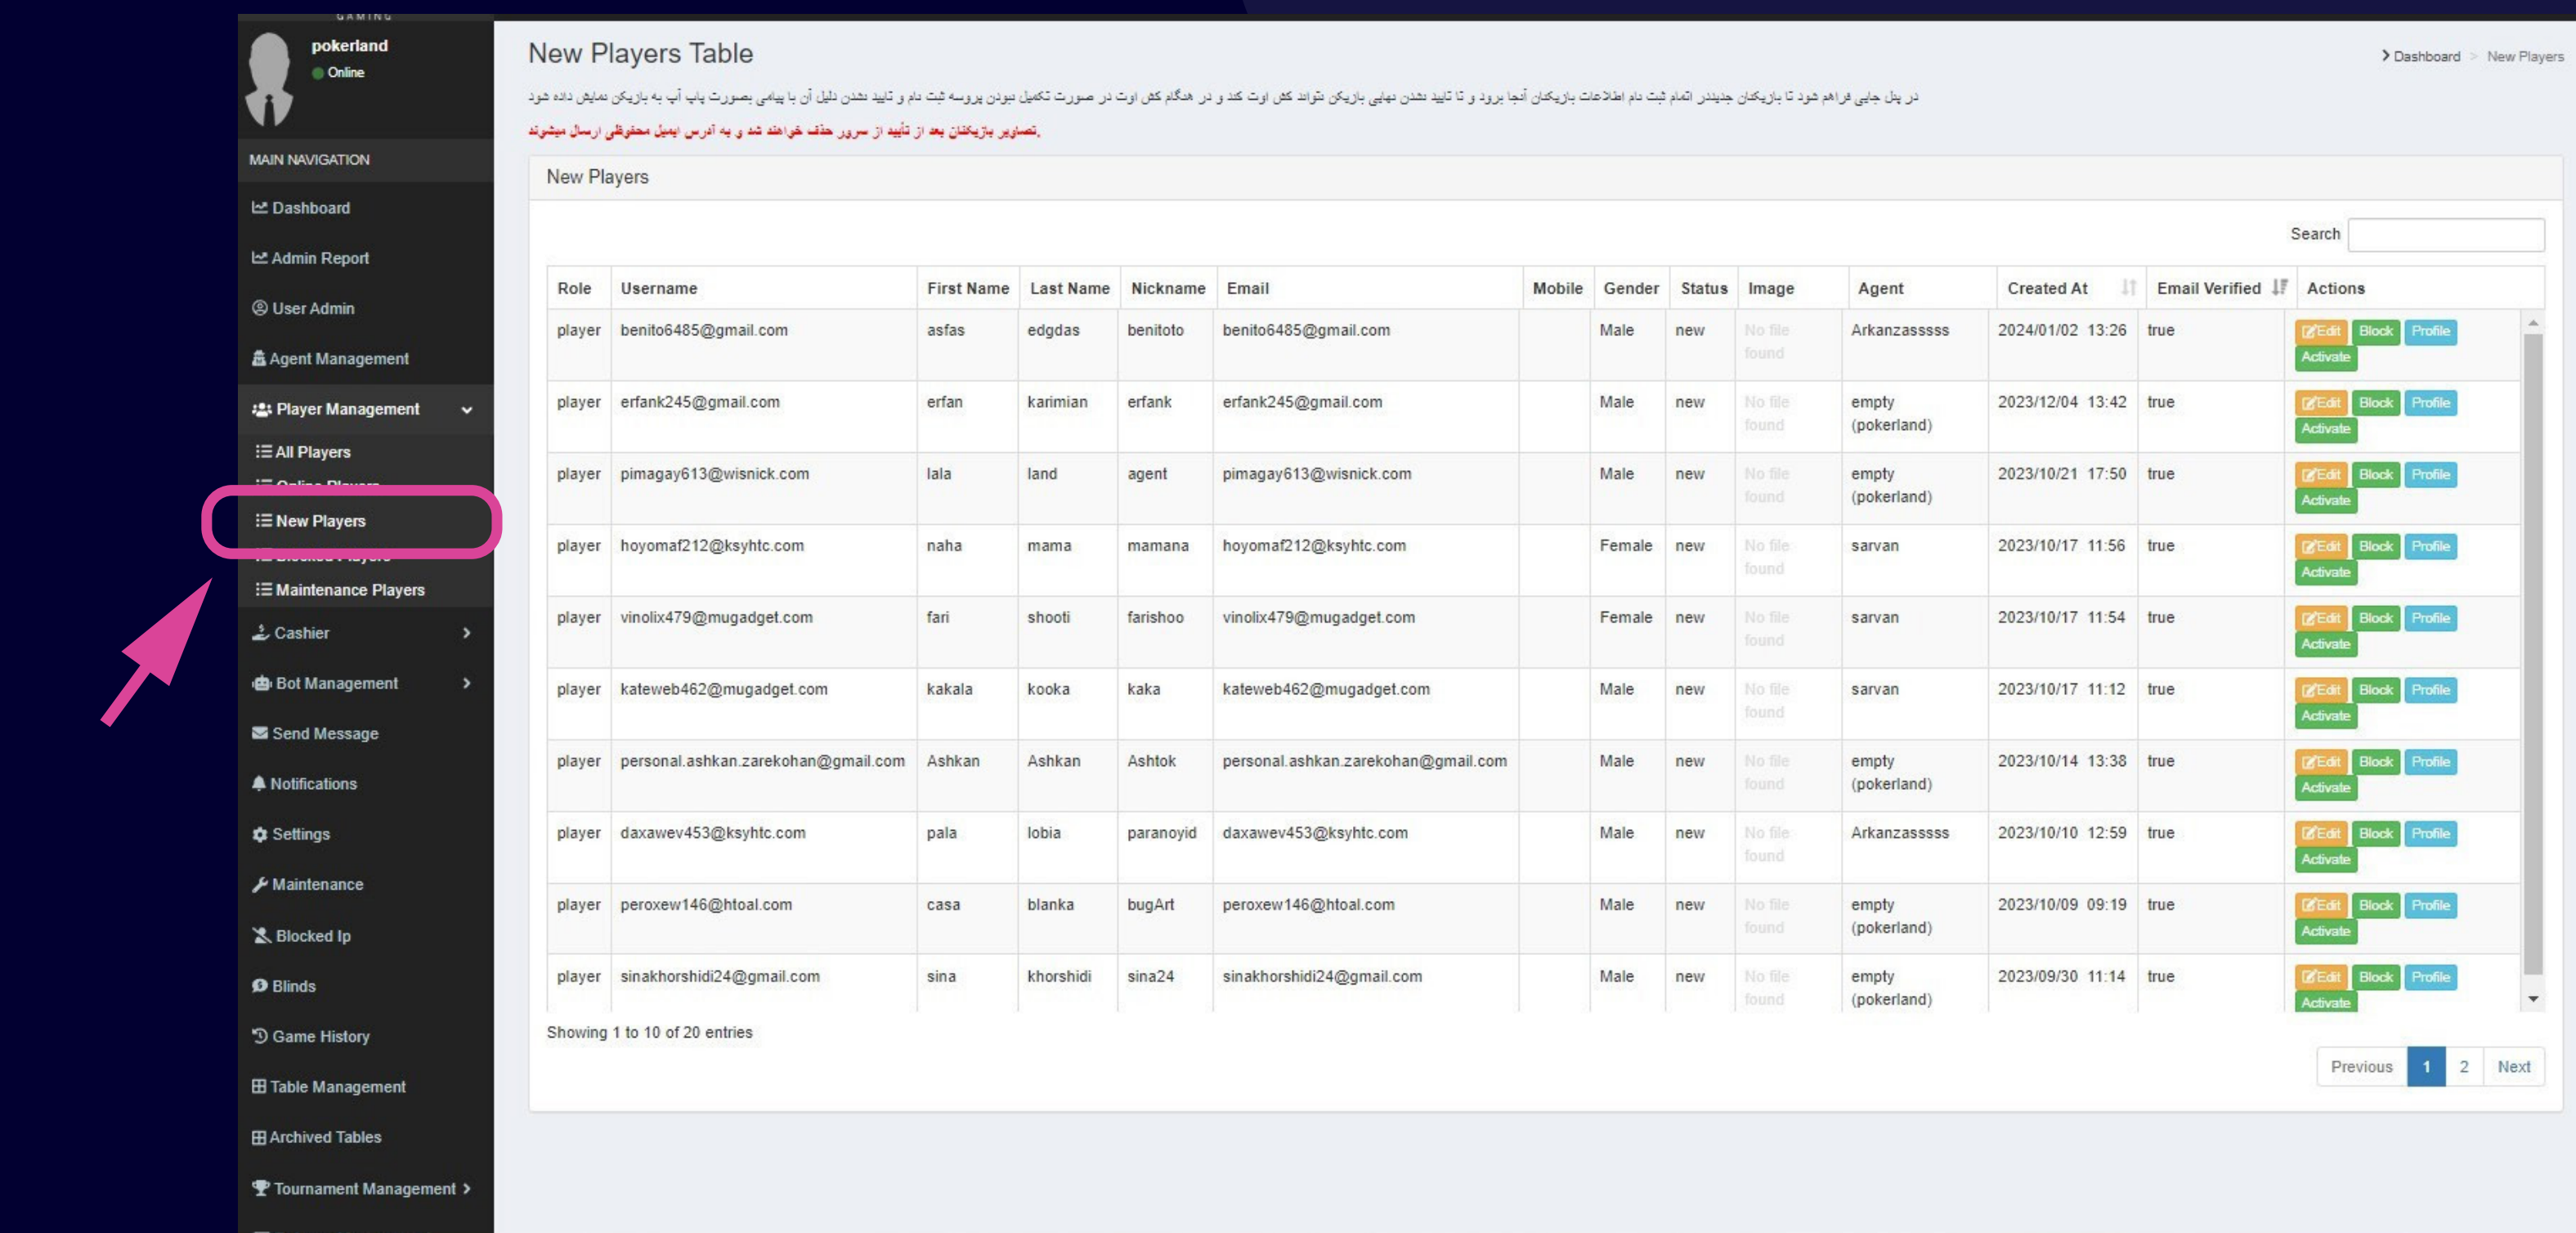

4.Blocked Players

Admins can review and manage a list of blocked players, including detailed history on why players were blocked and the ability to take further action if needed.

5. Game Maintenance

This area tracks game when undergoing maintenance, enabling admins to alarm players in their game and hold them out to queue again until all players are safely hanged up until the maintenance process is finished.

Bonus Codes

In the Bonus Codes Table, admins can create, edit, and manage various bonus codes, allowing them to run promotions and reward players with ease.

VIP Point

The game rewards players who reach certain VIP point milestones. This section tracks VIP points earned by players, helping to reward loyalty and high engagement with special benefits based on their accumulated points. Rewards will be paid out in full.

Top Rakes

Displays a list of top players who have reached a certain time limit, rewarding those who have played and received rewards based on that information. This feature also offers insights into the highest-contributing players on the platform.

Top Hands

Shows the top players ranked by the number of high hands won, allowing admins to identify the most successful players on the platform and assign rewards to them.

Conversion Fee

This feature allows for the conversion of USD to Euro, providing admins with easy handling of currency exchanges within the platform.

Transaction History

The Transaction History section provides a comprehensive overview of all financial transactions, ensuring transparency and complete oversight of player activity. It tracks cash-ins, cash-outs, chip transfers between players, and jackpot chip movements, with detailed information on their origins, allowing admins to monitor any irregularities. The platform also supports the creation of unique bonus codes to boost player engagement. VIP points are tracked to reward player loyalty, and the section includes insights into top players, rake and hands points, commissions received, rake back received, and private table fees, ensuring a full history of all transactions.

- Cash outs
- Cash ins

- Private Table Fees
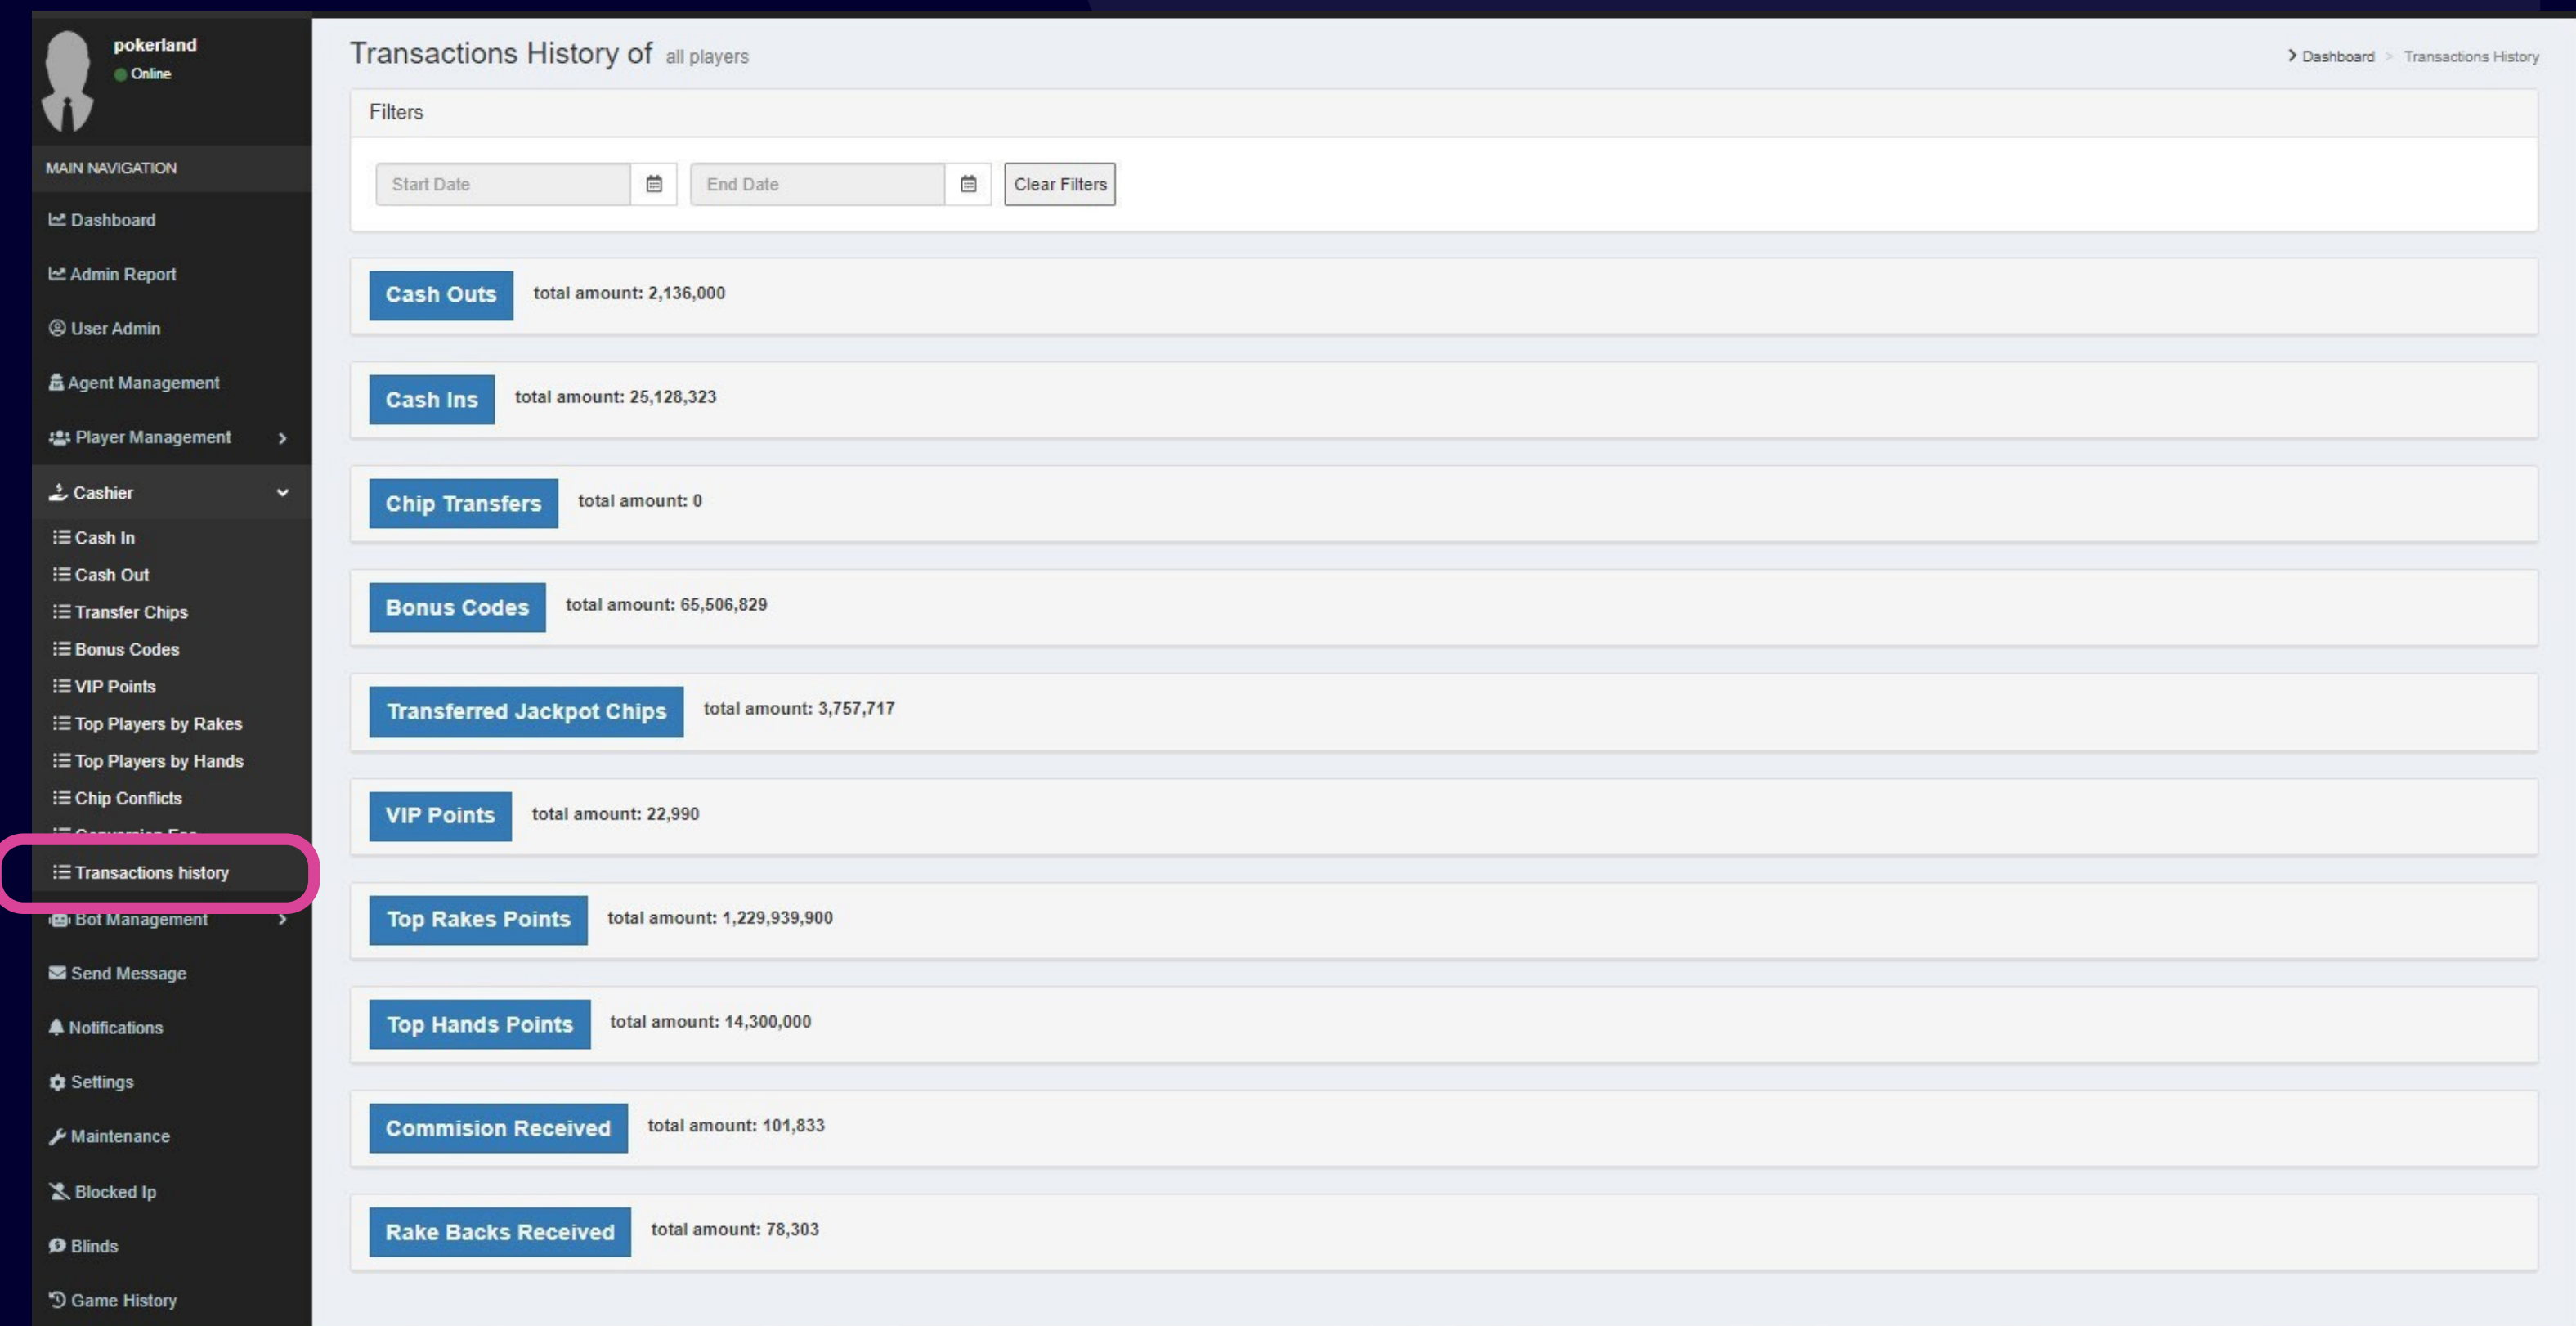

Bot Management

Bot Management provides tools to add or remove chips from bots, edit bot profiles, and review their game history, ensuring smooth integration of bots into gameplay.

1-All Bot: The All Bot section in Bot Management enables admins to add or deduct chips, review bots' game history, view and manage bot profiles, and make necessary edits, ensuring efficient control over bot behavior and their integration into gameplay.

2-Bot Add Chip History: This section provides a detailed log of all chip transactions involving bots, including additions or deductions, helping admins track the flow of chips between bots and maintain fair gameplay.

3-Bot Structures for Call & Raise: In this section, admins can configure and manage the decision-making structures for bots regarding call and raise actions. This ensures that bots behave according to the intended difficulty level and strategy of the platform.

Send Public Messages

Admins can send public in-app messages to players, ensuring clear communication about updates, promotions, or system issues.

Game History by Date and Time Search Box

This section allows admins to search for specific game sessions based on date and time, providing detailed records for review or auditing.
Table Management by kinds of sort and search title

This feature allows admins to sort and search player tables based on different criteria, such as player names, activity levels, and in-game performance, streamlining data management and facilitating quick access to important information.

Archive Table

The Archive Table section stores historical data and records of players, games, and transactions that are no longer active but still require retention for reference or auditing purposes, ensuring compliance and data transparency.

API

Seamlessly integrate with external applications and streamline transactions with our API access feature, allowing you to connect any company's interface to the poker software application. This ensures a smooth flow of integration through our highly compatible API tools.

Tournament API
Payment API
Rooms API
Login API
Profile API
Chat API
Lobby API
Balance API

Direct Integration: Connect external applications like casinos, online bets, or websites to the cashier section, enabling smooth interaction and transactions.

API Service: Enable payments, cashouts, and interaction with the cashier section for external platforms such as casinos and BITS, enhancing efficiency and accessibility.
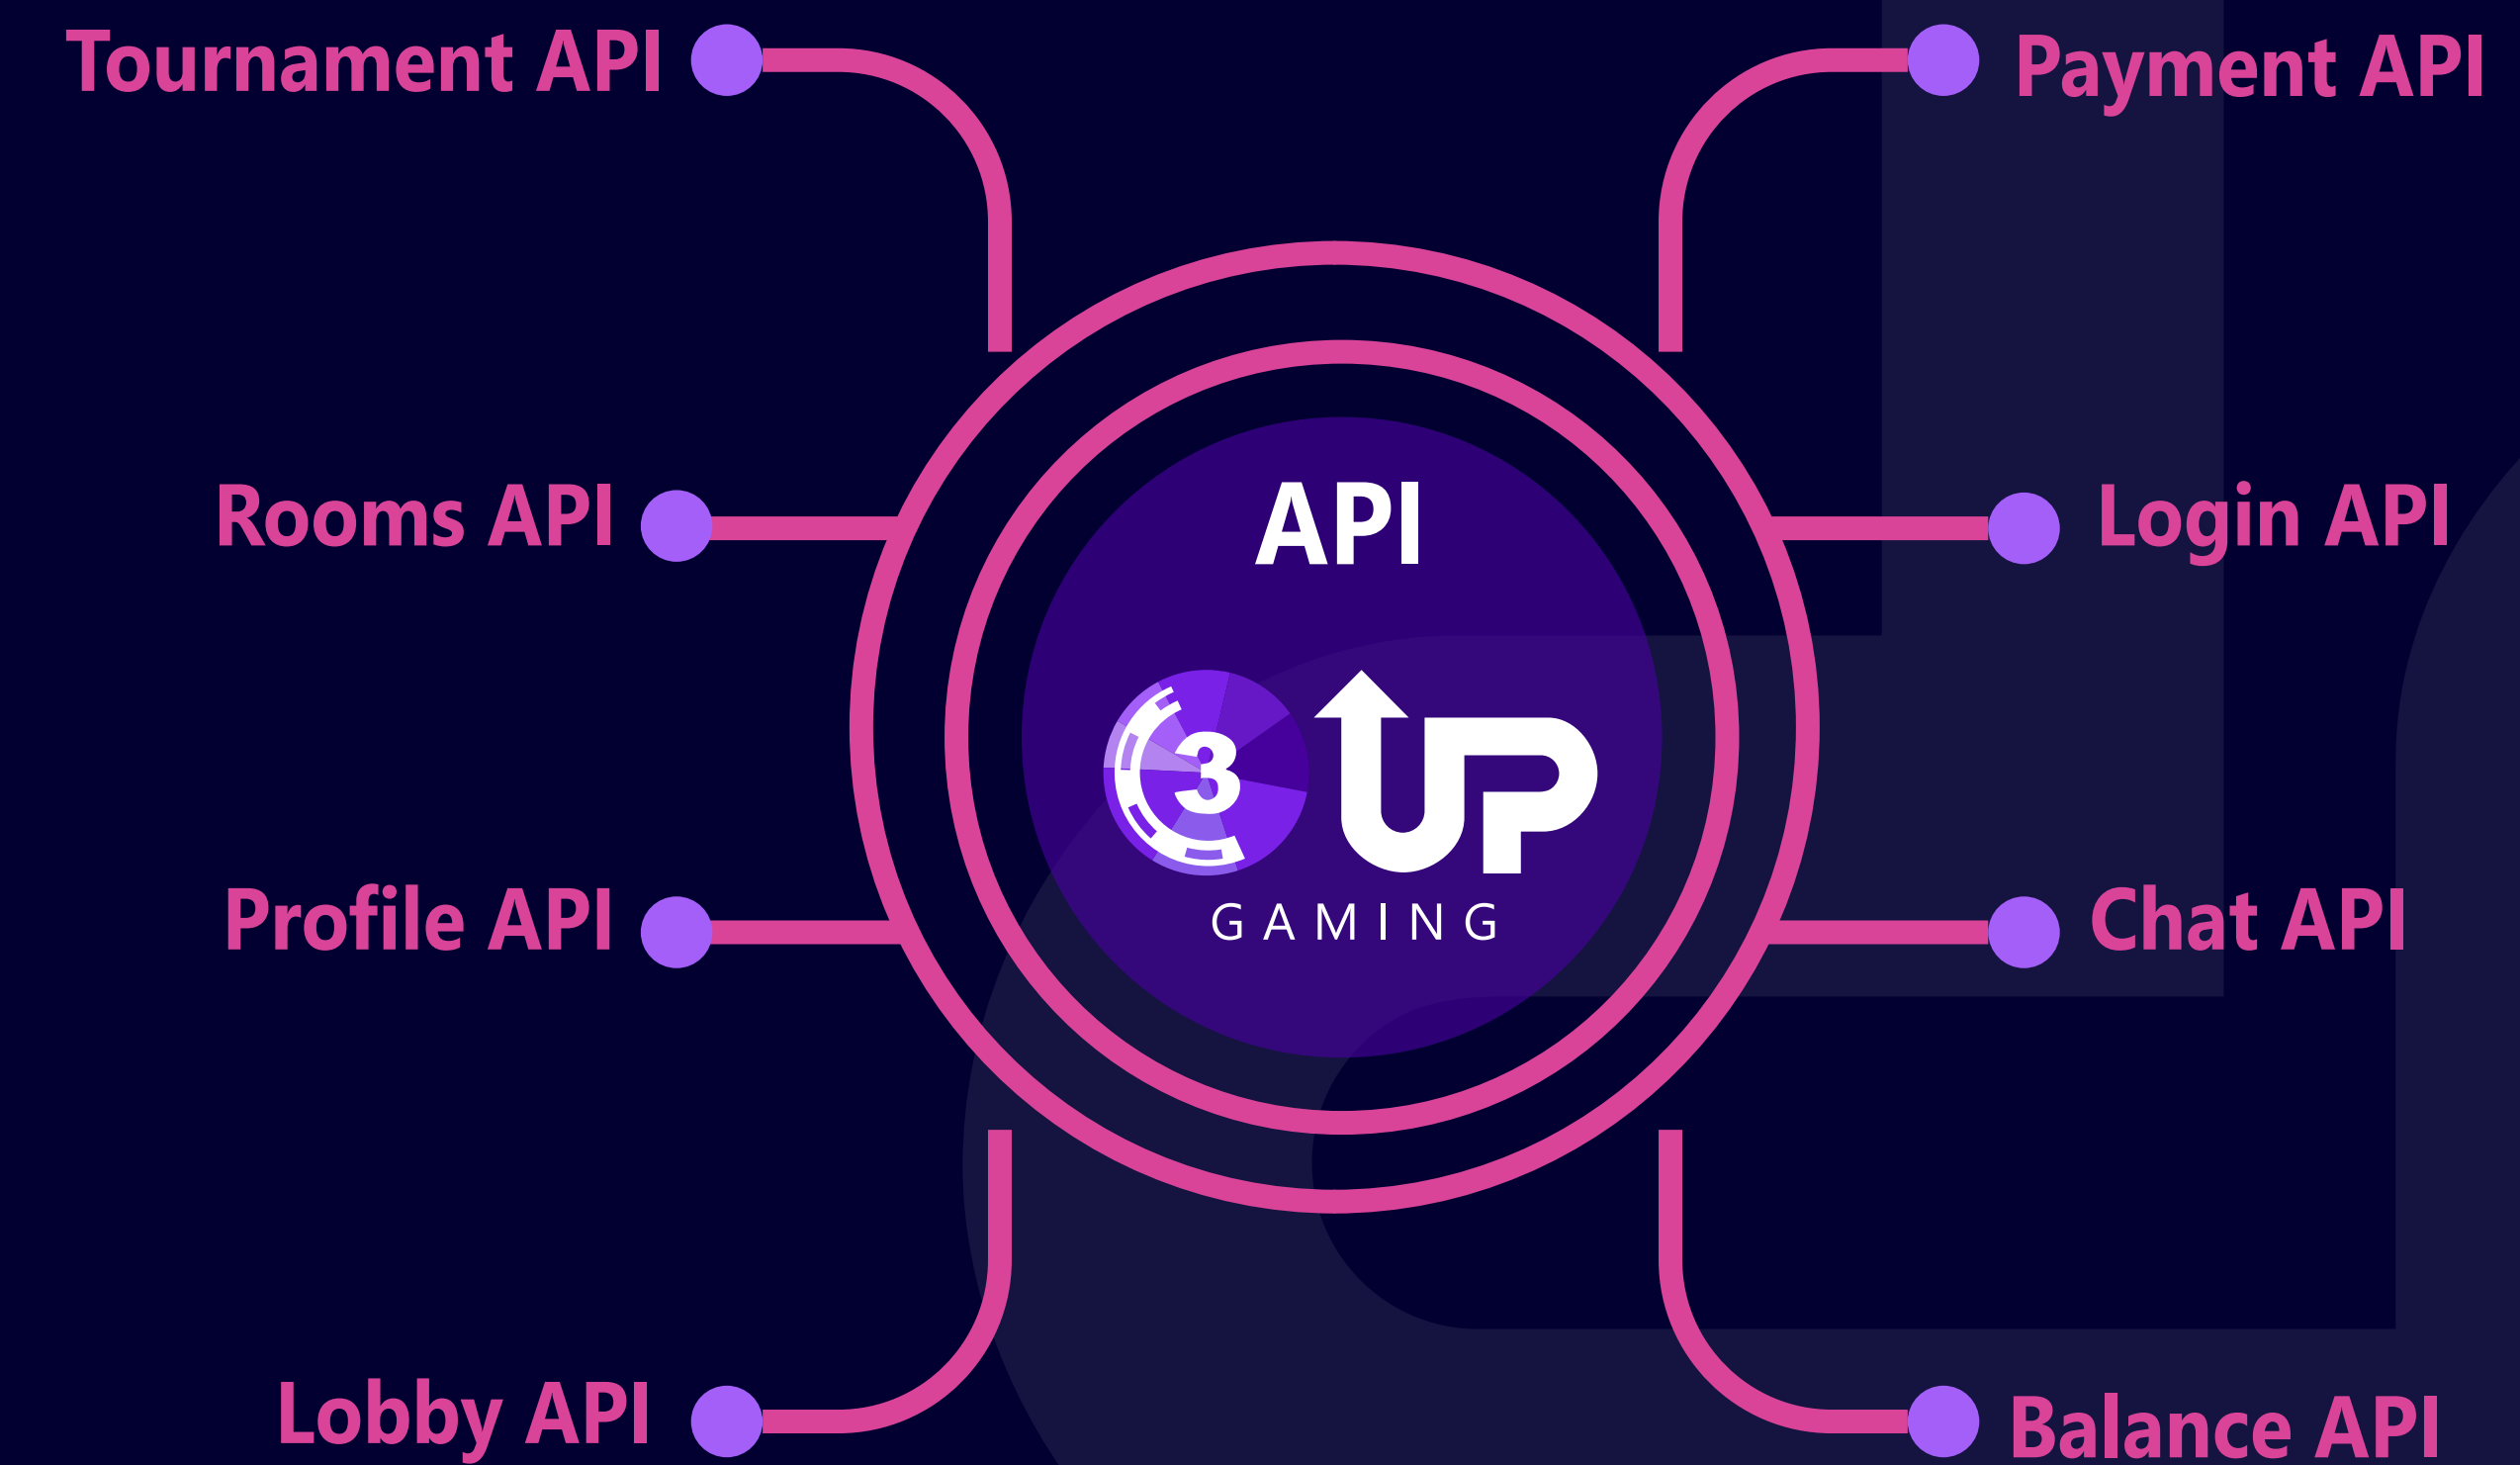

Use cases include seamless API integration for casinos, betting platforms, and third-party financial apps, including Wallet Connect, facilitating smooth cashouts where users can be informed from their actions through email and SMS.

Technology Features

3UP Gaming is a robust poker platform that combines advanced technology, security, and flexibility in its business models. It leverages cutting-edge tech, ensuring a seamless and secure user experience across various platforms.

Tech Stack: C#, C++, JavaScript, Node.js, Unity, MongoDB, Docker, Web3, Socket.IO, Jobs, HTML5.

Security: Encrypted data transfer, software protection, GPS/IP-based anti-collusion, hacking prevention.

Business Models: Payment gateways, agent/cash site system, cryptocurrency, hybrid transactions, game API connections, third-party APIs.

Summing Up Our Gaming Experience: The Nutshell

Thank you for delving into the extensive features of our online poker platform. Our Cashier section stands as a testament to our commitment to seamless transactions, offering automatic cash-in and cash-out functionalities that streamline the gaming experience. Moreover, our platform boasts a plethora of rewarding options, including bonuses and referral codes, ensuring that both players and agents are incentivized to participate and engage.

With a diverse array of tournament types and customizable gameplay options, our platform caters to players of all skill levels and preferences. Whether you're a seasoned pro or a newcomer to the game, you'll find something to suit your tastes and challenge your abilities. And rest assured, our stringent security measures are in place to maintain a safe and fair gaming environment for all participants.

But our dedication to innovation doesn't stop there. Our API access feature opens up a world of possibilities for collaboration and integration with external applications. By seamlessly connecting with other platforms, we're expanding the horizons of what's possible in the gaming industry, driving forward progress and pushing the boundaries of what's possible.

At 3UPGAMING, we're not just revolutionizing the way people play poker online – we're shaping the future of gaming as a whole. Join us on this journey, and experience the excitement and opportunity that awaits in the world of online gaming.
